PROFESSIONAL SUMMARY

VP Infrastructure leader with 20+ years owning cloud, network, and platform functions across multi-client enterprise environments. At IRIS, architected and operated AWS-core infrastructure for Tier-1 banking clients (ADP, Charles Schwab, BMO) -- designing scalable, highly available systems on EC2, ECS/EKS, Lambda, VPC, IAM, ALB/NLB, and CloudWatch; driving IaC maturity through Terraform and CDK; and eliminating deployment inconsistencies across dev, UAT, and production with containerised CI/CD pipelines delivering 200+ builds per hour. Built and scaled distributed engineering teams from scratch (4 to 40 across India, Canada, and the US) and transformed operational posture from reactive to predictive through SRE practices -- reducing MTTR by 40%+. Certified across the full cloud stack (AWS SAA-C01, Azure AZ-305, GCP PCA, CKAD), ITIL-aligned, Masters in Artificial Intelligence (Woolf University, 2024), General Management Programme (ISB Hyderabad, 2022).

CORE COMPETENCIES

AWS Infrastructure Architecture | Terraform & IaC Maturity | SRE & Reliability Engineering | High Availability & Auto-Scaling | CI/CD Reliability & Deployment Governance | Multi-Region Distributed Teams | Containerisation (Kubernetes / ECS) | Cloud Security & DevSecOps | Incident Management & RCA | SLO / SLI / Error Budget Governance | Vendor & Stakeholder Management | Team Building & Technical Mentorship

WORK EXPERIENCE

IRIS Software | Clients: ADP, Charles Schwab, BMO — Sep 2020 - Present

Sr. Specialist -- Cloud Practice & SRE Lead | India

- Architected and delivered **AWS infrastructure for BMO** -- CDK-enabled ECS Fargate + Lambda pipelines with ALB/NLB load balancing, VPC network design, IAM governance, CloudWatch observability, and HA/DR built into the architecture from day one; drove FinOps rightsizing to reduce cloud waste across the AWS estate.
- Led **GCP landing zone** preparation and cloud-native migration POCs for Charles Schwab (TD Ameritrade merger integration), validating cross-platform artifact deployment alignment across both environments.
- Designed **modeas**: a containerised, Terraform-driven deployment platform handling 200+ builds/deployments per hour -- eliminating inconsistencies across dev, UAT, and production environments, ensuring stable, predictable releases at scale, and cutting 10,000+ manual ops hours annually.
- Established SRE practices at ADP: defined SLOs/SLIs, error budgets, and chaos engineering (Keptn); automated remediation via Dynatrace + Ansible; instituted blameless postmortem culture -- reducing **MTTR by 40%+** and transforming the org from reactive incident response to predictive reliability.
- Deployed full-stack observability (Prometheus, Grafana, Dynatrace, CloudWatch) with alert-to-ticket pipelines (ServiceNow) for real-time incident detection, root cause analysis, and auto-remediation across multi-cloud platforms.
- Enforced shift-left security across CI/CD pipelines -- integrating SonarQube, JFrog Artifactory, and SAST/DAST/IAST scanning to ensure consistent, audit-ready delivery across all environments.
- Implemented ITIL-aligned incident, problem, and change management with structured RCA workflows and measurable improvements in change success rate and system resilience.
- Scaled ADP's infrastructure org from **4 to 40 engineers** across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from the ground up; presented infrastructure strategy, reliability outcomes, and capacity plans directly to VP and C-suite stakeholders.
- Architected the **Cloud Platform Maturity Index (CPMI)** -- an OKR-linked governance framework tracking infrastructure capability, cost, and security milestones across three Tier-1 banking clients.

IRIS Software | Client: Royal Bank of Canada Insurance — Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada

- Improved infrastructure maturity and ensured **consistent, repeatable deployments** across dev, UAT, and production for 250+ applications -- inducting the DORA framework (Deployment Frequency, Lead Time, CFR, MTTR) via Azure DevOps with KPI dashboards and executive reporting forums across 60+ teams.
- Designed the **Robo Deployment Framework** (PowerShell + Ansible) -- reducing application onboarding from 5 weeks to 5 hours (98% reduction); governed change management with SOX/GDPR-compliant audit-ready pipelines and SAST/DAST/IAST enforcement across 250+ applications.
- Established SRE principles -- observability standards, incident classification frameworks, and reliability-focused deployment gates; led GitHub enterprise migration of 250+ applications across 60+ teams, enabling self-service CI/CD at scale.

IRIS Software | Clients: Insurance & Capital Markets — Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada

- Designed fault-tolerant, container-orchestrated deployment pipelines (Kubernetes, Helm) for zero-downtime rollouts across capital markets platforms; led RPA practice automating 80+ applications; contributed to $478K SOW closure.

Microsoft Corporation

Jul 2007 - Dec 2014

Sr. SDET -- QA, Automation & Production Engineering | India

- Production Engineering owner for global Sales & Marketing SaaS platforms serving US, EMEA, and APAC -- sole accountability for infrastructure reliability, scalability, and performance, sustaining **99.99% uptime** over 7 years with zero customer-impacting incidents and absorbing 200% user growth.
- Owned all non-functional objectives (availability, scalability, security, performance), incident response, RCA, and cross-team coordination; defined reliability targets and error budgets aligned to global business outcomes.

Earlier: Technology Manager, TechMahindra (Adobe) 2015-2017 | Sr. Test Engineer, Semantic Space Technologies (Bank of America) 2005-2007 | Software Consultant, DRDO 2002-2004

KEY PROJECTS

BMO AWS Infrastructure -- ECS Fargate / HA/DR

AWS / CLOUD

End-to-end AWS infrastructure design: CDK pipelines, ECS Fargate, Lambda, ALB/NLB, VPC, IAM, CloudWatch. HA/DR architecture from day one. FinOps rightsizing post-migration. GCP landing zone at Schwab.

AWS CDK | ECS Fargate | Lambda | ALB/NLB | CloudWatch | IAM | Terraform | GCP

modeas -- Containerised IaC Delivery Platform

CI/CD / IaC

200+ builds/deployments per hour; consistent dev/UAT/prod environments; 10,000+ manual ops hours eliminated/year; 600% deployment cadence improvement. Terraform-driven, repeatable across all environments.

Terraform | Kubernetes | Helm | Jenkins | Ansible | Azure DevOps

ADP SRE Transformation -- Reliability at Scale

SRE / PLATFORM

Built SRE org from 4 to 40 engineers; defined SLOs/SLIs, error budgets, chaos engineering, auto-remediation. MTTR -40%. Predictive fault detection before business impact.

Dynatrace | Prometheus | Grafana | Ansible | Keptn | ServiceNow | Python

Robo Deployment Framework -- RBC Insurance

IaC / DEVSECOPS

Repeatable, consistent deployments across dev/UAT/prod for 250+ apps. 98% onboarding reduction (5 weeks -> 5 hours). SOX/GDPR-compliant pipelines. DORA governance with executive KPI dashboards.

PowerShell | Python | Ansible | GitHub | Jenkins | UrbanCode | Azure DevOps

EDUCATION

Masters in Artificial Intelligence	Woolf University	2024
General Management Programme (GMP)	ISB Hyderabad	2022
M.Sc Computer Science	Osmania University	2002
B.Sc Electronics	Kakatiya University	2000

CERTIFICATIONS

AWS Solutions Architect Associate (SAA-C01)	Amazon	2026
Azure Solutions Architect Expert (AZ-305)	Microsoft	2026
GCP Professional Cloud Architect	Google	2026
Certified Kubernetes Developer (CKAD)	CNCF	2025
ITIL -- IT Service Operations	AXELOS	
Azure AI Engineer (AI-102) & Data Scientist (DP-100)	Microsoft	
PMI Agile Certified Professional (PMI-ACP)	PMI	

TECHNICAL SKILLS

AWS: EC2, ECS/EKS, Lambda, VPC, IAM, S3, RDS, ALB/NLB, CloudWatch, CDK, Bedrock

IaC & Config: Terraform, Ansible, AWS CDK, Helm, Kubernetes (CKAD), Docker

CI/CD: Jenkins, GitHub Actions, Azure DevOps, UrbanCode, SonarQube, JFrog Artifactory

Observability & SRE: Dynatrace, Prometheus, Grafana, Splunk, MS AppInsights, CloudWatch, Keptn **Cloud:** AWS, Microsoft Azure, GCP

ITSM: ServiceNow, ITIL, Jira, DORA framework **Languages:** Python, Go, PowerShell, Bash, Groovy
