Vice President of Infrastructure

Toku | 7 June 2026

Dear Hiring Manager,

A company that listed on SGX in January, 31.9 times oversubscribed, with 47% revenue growth, is not looking for a caretaker. It needs someone who can build an infrastructure function that scales with the business and earns investor confidence. That is the mandate I have been executing for the past six years.

At IRIS, I simultaneously owned infrastructure for three Tier-1 banking clients -- ADP, Charles Schwab, and BMO. At BMO, I designed and delivered the AWS production infrastructure from the ground up: CDK-enabled ECS Fargate pipelines, VPC network architecture, IAM governance, ALB/NLB load balancing, CloudWatch observability, and HA/DR built into the architecture on day one -- not added later. At ADP, I took an infrastructure team of four and scaled it to forty engineers across India, Canada, and the US while transforming the operational posture from reactive to predictive: SLOs and error budgets defined, chaos engineering stood up, Dynatrace-driven automated remediation deployed, MTTR down 40%+ inside twelve months. And with *modeas*, I designed and delivered a Terraform-driven containerised deployment platform that handled 200+ builds and deployments per hour while eliminating the dev/UAT/production environment drift that causes most deployment incidents. That is the infrastructure leadership, AWS depth, and IaC discipline your JD describes.

I have also operated in cross-region environments throughout my career -- building teams across time zones, coordinating with US and Canadian client stakeholders, and maintaining reliable delivery cadence despite 9-to-12-hour gaps. The Netherlands coordination your JD mentions is a familiar operational pattern, not a new challenge.

On company size: Toku at 72 people means the VP Infrastructure role carries genuine ownership -- architecture decisions, team structure, vendor relationships, and board-level visibility. I have built functions from zero before. That context is where I do my best work. I would welcome a short call to confirm alignment on scope, comp, and the Bangalore-based arrangement before we go further.

Yours sincerely,

Pavan Kumar Nayakanti
