Re: Director, Technology - Infrastructure Engineering (Career Level L4)

First Citizens BancShares' 125-year track record of stability - and the post-SVB growth mandate now driving the Bengaluru GCC - make this Director role one of the most compelling infrastructure leadership opportunities in Indian BFSI. I bring exactly what the JD specifies: 20+ years in 24x7 banking infrastructure, ITIL certification, AWS SAA-C01, and a proven record of building and scaling 30+ engineer teams in regulated financial environments.

As Cloud Practice and SRE Lead at IRIS Software, I scaled ADP's SRE organisation from 4 to 35 engineers across India, Canada, and the US - establishing on-call rotations, ITIL-aligned incident/problem/change management, and blameless postmortem culture that reduced MTTR by 40%. I subsequently built Charles Schwab's 18-member Platform Engineering team from scratch. These are not team-leadership adjacencies; they are the direct precedents for leading a 30-engineer, 2-shift operation.

On the technical stack: I led BMO's full on-premises-to-AWS migration with HA/DR engineered from day one, governed 250+ applications under SOX/GDPR compliance at RBC, and hold the exact certifications the JD lists - AWS SAA-C01 and ITIL in IT Service Operations. My Cloud Platform Maturity Index (CPMI) framework delivered measurable reliability and security improvements across three Tier-1 banking clients simultaneously. On vendor governance, I designed and operated MSP scorecards with structured SLA escalation frameworks at IRIS - directly transferable to First Citizens' insourcing mandate.

I am open to relocating to Bangalore for the right Director-level opportunity, and First Citizens India qualifies on every dimension: banking domain, team scale, leadership authority, and growth trajectory.

I would welcome the opportunity to speak with you about how my background maps to First Citizens India's infrastructure engineering goals.

Sincerely,
Pavan Kumar Nayakanti
