Hyderabad, India

PROFESSIONAL SUMMARY

Infrastructure and reliability engineering leader with 20+ years of experience building and governing enterprise-scale platforms across SAN storage, cloud infrastructure, and mission-critical financial systems. Specialist in applying SRE principles -- SLO/SLI definition, error budgets, toil reduction, and post-incident learning -- to drive measurable reliability improvements across complex infrastructure estates. Deep expertise in full-stack observability, automation-first operations, and ITIL-aligned incident management at scale. Proven track record leading cross-functional engineering teams (35+ engineers) across FinTech and Banking clients including ADP, Charles Schwab, BMO, and RBC, with consistent executive-level stakeholder communication and governance accountability.

CORE COMPETENCIES

SAN & Block Storage Infrastructure

SRE -- SLO/SLI/Error Budgets

Enterprise Observability & Alerting

Infrastructure Automation & IaC

Disaster Recovery & Resilience Engineering

Kubernetes & Container Platforms

ITIL / Incident & Change Management

Cross-Functional Infrastructure Leadership

WORK EXPERIENCE

IRIS SoftwareSep 2020 -- Present

Sr. Specialist -- Cloud Practice & SRE Lead | India | Clients: ADP, Charles Schwab, BMO

- Governed enterprise infrastructure reliability across multi-client cloud and on-premise platforms -- defining SLOs, SLIs, and error budgets for ADP, Charles Schwab, and BMO, with structured error budget policies tied to deployment gates and incident response thresholds.
- Designed and deployed full-stack observability (Prometheus, Grafana, Dynatrace, Splunk) for ADP's infrastructure estate -- covering metrics, logs, and traces with real-time alerting strategies that shifted operations from reactive to predictive.
- Led incident management and postmortem programmes with blameless culture -- implementing structured RCA workflows, cross-team postmortems, and automated remediation via Ansible and Python, reducing MTTR by 40%+.
- Implemented ITIL-aligned incident, problem, and change management across ADP and RBC -- enforcing operational runbooks, audit-ready change evidence pipelines, and SOX/GDPR-compliant governance for 250+ applications.
- Delivered infrastructure automation using Python, Ansible, Terraform (IaC), and GitHub Actions -- eliminating manual operational toil and improving consistency across multi-cloud and on-premise environments.
- Deployed **GenAI and AIOps-driven assistants** on Azure and AWS for BMO -- using intelligent telemetry to surface anomalies, reduce manual analysis effort, and accelerate incident triage across infrastructure operations.
- Established Chaos Engineering practices using Keptn for ADP SRE -- proactively identifying fault scenarios in storage and compute layers and hardening platform resilience under real-world failure conditions.
- Scaled ADP's SRE organisation from 4 to **35 engineers** across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from the ground up with embedded reliability reviews and disaster recovery readiness.

IRIS Software

Jun 2018 -- Sep 2020

Automation Technology Specialist | Toronto, Canada | Client: Royal Bank of Canada Insurance

- Established SRE principles within RBC's DevSecOps programme -- introducing observability standards, incident classification frameworks, and reliability-focused deployment gates across **250+ applications**.
- Designed and delivered the **Robo Deployment Framework** -- a Kubernetes-native CI/CD orchestration platform; reduced application onboarding from 5 weeks to 5 hours (98% reduction).
- Governed enterprise change and incident management for 250+ applications -- standardising deployment runbooks, enforcing SOX/GDPR compliance, and delivering structured audit-ready change evidence pipelines.
- Implemented Splunk-based log aggregation and alerting pipelines integrated with CI/CD -- enabling proactive detection and rapid response to production infrastructure incidents.
- Automated migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub, eliminating manual infrastructure dependency management at scale.

IRIS Software

Feb 2017 -- Jun 2018

Automation Architect | Toronto, Canada | Clients: Insurance & Capital Markets

- Designed fault-tolerant, container-orchestrated infrastructure pipelines using Kubernetes and Helm -- enabling zero-downtime rollouts across capital markets platforms.
- Built Python-based automation frameworks for infrastructure operations -- standardising deployment workflows and scaling an offshore delivery team for enterprise automation in regulated domains.
- Led RPA practice delivery automating **80+ applications and 250+ components** across heterogeneous infrastructure stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).

TechMahindra Pvt. Ltd.

Jul 2015 -- Feb 2017

Technology Manager | Noida, India

- Led cross-functional global engineering teams delivering large-scale infrastructure automation and DevOps transformation programmes across enterprise clients.
- Drove adoption of CI/CD pipelines and agile delivery practices -- improving infrastructure release frequency and operational resilience across distributed teams.

Microsoft Corporation

Jul 2007 -- Dec 2014

Sr. SDET -- Automation Architect | India

- Maintained **99.99% platform uptime** for Microsoft's global marketing infrastructure over 7 years through proactive SLI monitoring, automated recovery mechanisms, and postmortem-driven improvement cycles.
- Administered Windows and Linux server infrastructure; drove root cause analysis and cross-functional production support for mission-critical platform incidents.
- Built QA automation frameworks integrated with CI/CD pipelines -- embedding automated regression and performance testing into infrastructure release gates.

KEY INFRASTRUCTURE PROJECTS

ADP SRE Platform Transformation SRE / Observability / Automation

Designed and governed end-to-end SRE programme for ADP's enterprise infrastructure -- SLO/SLI definition, error budgets, chaos engineering (Keptn), full-stack observability (Dynatrace + Prometheus + Grafana), and AIOps-driven automated remediation. Reduced MTTR by 40%+ and converted reactive ops to predictive reliability operations.

Dynatrace, Prometheus, Grafana, Ansible, Python, Keptn, Splunk, AWS, Azure

Robo Deployment Framework (RBC) Kubernetes / IaC / Infrastructure Automation

Delivered a Kubernetes-native, technology-agnostic CI/CD orchestration platform for Royal Bank of Canada -- governing infrastructure deployments across 250+ applications. Reduced application onboarding from 5 weeks to 5 hours (98% reduction) with SOX/GDPR-compliant change evidence pipelines.

Kubernetes, Helm, Python, Ansible, GitHub, Splunk, SOX/GDPR compliance

modeas High-Throughput Deployment Platform Infrastructure Automation / DevOps

Designed and delivered an enterprise deployment platform for ADP handling 200+ builds/deployments per hour, eliminating 10,000+ manual operational hours annually and improving deployment cadence by 600%. Implemented with IaC-driven self-healing and automated rollback capabilities.

Kubernetes, Helm, Jenkins, GitHub Actions, Ansible, Terraform, AWS, Azure

Cloud Platform Maturity Index (CPMI) Infrastructure Governance

Architected a cross-client infrastructure governance framework measuring cloud security, operational efficiency, and capability maturity across ADP, Charles Schwab, and BMO -- used to drive structured improvement programmes and executive reporting.

AWS, Azure, Terraform, Security Controls, Operational Governance

EDUCATION

Masters in Artificial Intelligence	Woolf University	2024
General Management Program (GMP)	ISB Hyderabad	2022
M.Sc in Computer Science	Osmania University	2002

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD)	2025
Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	2026
AWS Certified Solutions Architect -- Associate (SAA-C01)	2026
AI-102: Designing and Implementing a Microsoft Azure AI Solution	2025
Certified SRE (iSRE) ITIL Certificate in IT Service Operations PMI-ACP	

SKILLS

Storage & Infrastructure: SAN (Storage Area Network), Kubernetes storage, IaC-driven infrastructure, VMware exposure

Cloud & Platform: AWS, Microsoft Azure, Kubernetes, Docker, Helm, Terraform, AWS CDK, Ansible

Observability & AIOps: Dynatrace, Prometheus, Grafana, Splunk, MS App Insights, AppDynamics, Telegraf

SRE & Reliability: SLI/SLO/Error Budgets, Chaos Engineering (Keptn), Self-Healing, Disaster Recovery, Incident Management

Automation & Scripting: Python, Ansible, Bash, PowerShell, Go, GitHub Actions, Jenkins, IaC pipelines

Security & Compliance: SOX/GDPR-compliant change pipelines, least-privilege access, audit governance

Service Management: ITIL (certified), ServiceNow, Incident/Problem/Change Management, Operational Runbooks

Languages: English (fluent), Hindi (fluent), Telugu (native)
