PROFESSIONAL SUMMARY

Infrastructure and operations leader with 20+ years managing enterprise-scale production services across global banking and FinTech - spanning Windows Server and Linux/RHEL administration, incident management, vulnerability remediation, and operations automation. Deep expertise in Azure cloud infrastructure (including AVS), SAN/NAS storage, ITIL-aligned change and problem management, and PowerShell/Ansible/Python-driven automation. Proven track record owning production environments with 99.99% uptime at Microsoft, reducing MTTR by 40%+ through automated remediation at ADP, governing 250+ application estates under SOX/GDPR compliance at RBC, and eliminating 10,000+ manual operational hours annually via infrastructure automation. Seeking a VP mandate to lead production services operations and embed automation-first infrastructure management at BNY's scale.

CORE COMPETENCIES

Windows Server & RHEL Administration

Infrastructure Automation (Ansible, PowerShell, Python)

Azure & Azure AVS

Incident, Change & Problem Management (ITIL)

Vulnerability Remediation & Patching

SAN / NAS Storage Administration

Operations Management & Governance

VMware Virtualisation & On-Prem Infrastructure

WORK EXPERIENCE

IRIS Software

Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India (Clients: ADP, Charles Schwab, BMO)

- Directed 24/7 production operations and incident management for banking platforms (ADP, Charles Schwab, BMO) - owning ITIL-aligned incident, problem, and change management with measurable improvement in change success rate and incident resolution trends.
- Reduced MTTR by **40%+** through Ansible-automated remediation workflows integrated with Dynatrace and Prometheus alerting - converting reactive infrastructure operations to predictive, self-healing models.
- Managed on-call rotations and escalation frameworks for a **35-member operations team**, embedding structured incident governance and blameless postmortem culture across the engineering organisation.
- Deployed and administered multi-cloud infrastructure on **AWS and Azure** - IaC-driven provisioning via Terraform and AWS CDK, Kubernetes container orchestration, and full-stack observability (Prometheus, Grafana, Dynatrace, Splunk).
- Governed MSP and vendor delivery quality through operational scorecards, SLA tracking, and structured escalation/remediation frameworks across three major banking clients.
- Led end-to-end on-premise to AWS cloud migration for BMO - CDK-enabled ECS Fargate and Lambda pipelines with High Availability and Disaster Recovery built-in.
- Delivered **modeas** - high-throughput automation platform handling 200+ builds/deployments per hour, eliminating 10,000+ manual operational hours annually and accelerating deployment cadence by 600%.
- Built Charles Schwab's 18-member Platform Engineering team from the ground up, establishing reliability reviews, incident governance, and release management practices.

IRIS Software

Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada (Client: Royal Bank of Canada Insurance)

- Designed and delivered the **Robo Deployment Framework (RDF)** - a PowerShell-native CI/CD orchestration platform enabling self-service release pipelines for Windows services, database deployments (SSIS, Oracle, SQL Server), and enterprise application workloads across 250+ applications.
- Governed enterprise-wide change management across 250+ applications - standardising deployment workflows, enforcing **SOX/GDPR compliance**, and ensuring audit-ready change transparency.
- Enabled SAST, DAST, and IAST scanning as systematic **vulnerability remediation** objectives - integrating SonarQube, Jenkins, and JFrog Artifactory into pipelines to enforce shift-left security and dependency patching across Java and multi-stack workloads.
- Embedded **Run-the-Bank (RTB)** and **Change-the-Bank (CTB)** principles - strict production/non-production environment segregation with continuous, governed deployment cadence.
- Implemented Splunk-based log aggregation and alerting pipelines, enabling proactive detection and rapid response to production infrastructure incidents.
- Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub - reduced onboarding from **5 weeks to 5 hours (98% reduction)**.

Microsoft Corporation

Jul 2007 - Dec 2014

Sr. SDET - Production Engineering & Infrastructure | India (US, EMEA, APAC)

- Owned end-to-end production operations for Sales & Marketing platforms serving Microsoft subsidiaries across US, EMEA, and APAC - accountable for **Windows Server and Linux infrastructure administration**, incident response, RCA, and sustained **99.99% uptime over 7 years**.
- Managed infrastructure across network, server, and application tiers - defining and enforcing non-functional standards (performance, availability, scalability, security) for tens of thousands of users globally.
- Built QA automation frameworks integrated with CI/CD pipelines, embedding automated regression and performance testing into release gates - eliminating manual testing bottlenecks.
- Modernised marketing platforms through cloud migration and self-healing architectures, supporting **200% user growth** with no degradation in platform reliability or coverage.
- Partnered with infrastructure and product teams in Agile delivery to define reliability targets, manage error budgets, and align operational objectives to global sales operations.

TechMahindra

Jul 2015 - Feb 2017

Technology Manager | Noida, India (Client: Adobe)

- Architected and delivered **zero-downtime business application migration** during Adobe's data centre relocation - owned the full plan, execution, and cutover, ensuring continuity across all production workloads.
- Led SAP HANA upgrades and HTTP/7 enablements - modernising Adobe's core application stack with minimal service disruption.
- Executed data and code migration from Informatica to SQL Server 2012 - schema redesign, ETL re-engineering, and data validation at enterprise scale.

IRIS Software

Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada (Insurance & Capital Markets)

- Designed fault-tolerant, container-orchestrated infrastructure using Kubernetes and Helm - enabling zero-downtime rollouts across capital markets platforms.
- Led RPA practice delivery - automating 80+ applications and 250+ components across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).
- Standardised Python-based automation frameworks and scaled an offshore delivery team for enterprise automation in regulated domains.

Semantic Space Technologies

Jan 2005 - Jun 2007

Senior Software Testing Engineer | India (Client: Bank of America)

- Sole L3 analyst supporting Statusmart application for 3,000+ sales team members at Bank of America - incident management, smoke/DB/integration testing, ETL development (SSIS), SQL scripting on SQL Server and Oracle.

KEY PROJECTS

Robo Deployment Framework - RBC Insurance Infrastructure Automation

PowerShell-native CI/CD orchestration platform providing self-service release pipelines for Windows services, SQL Server, Oracle, and SSIS deployments across 250+ applications and 60+ teams. Reduced onboarding from 5 weeks to 5 hours (98% reduction). SOX/GDPR-compliant change evidence built-in from day one.

PowerShell · Windows Server · SQL Server · Oracle · Jenkins · GitHub

modeas - High-Throughput Operations Automation Platform Operations Automation

Enterprise deployment and operations automation platform handling 200+ builds/deployments per hour across banking client environments. Eliminated 10,000+ manual operational hours annually and improved deployment cadence by 600% - freeing operations teams from toil for higher-value infrastructure work.

Python · Ansible · Terraform · AWS · Azure · Kubernetes · Prometheus

ADP SRE Operations Transformation Incident Management

Built ADP's SRE operations from 4 to 35 engineers. Instituted ITIL-aligned incident, problem, and change management with blameless postmortem culture and Ansible-automated remediation via Dynatrace alerting. Reduced MTTR by 40%+; improved change success rate measurably. Managed on-call rotations and SLO governance across the organisation.

Ansible · Dynatrace · Prometheus · Grafana · ServiceNow · ITIL

EDUCATION

Masters in Artificial Intelligence - Woolf University	2024
General Management Program (GMP) - ISB Hyderabad	2022
M.Sc in Computer Science - Osmania University	2002

CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	Microsoft	2026
ITIL® Certificate in IT Service Operations	AXELOS	
Certified SRE (iSRE)	iSRE Institute	
AWS Certified Solutions Architect - Associate (SAA-C01)	Amazon Web Services	2026
Google Cloud Certified - Professional Cloud Architect	Google	2026
Certified Kubernetes Application Developer (CKAD)	CNCF	2025
Microsoft Certified: Azure AI Engineer Associate (AI-102)	Microsoft	
PMI Agile Certified Professional (PMI-ACP)	PMI	

SKILLS

OS & Infra: Windows Server, RedHat Linux (RHEL), Ubuntu, Cisco UCS (adjacent)

Cloud: Microsoft Azure, Azure AVS, AWS, Kubernetes, Docker, Helm, Terraform, AWS CDK

Automation: Ansible, PowerShell, Python, Bash, Jenkins, Azure DevOps, GitHub Actions, UrbanCode

Virtualisation: Kubernetes, Docker, Helm; Azure AVS (VMware in Azure) **Storage:** Storage Area Network (SAN)

Observability: Dynatrace, Prometheus, Grafana, Splunk, MS Application Insights, AppDynamics

ITSM: ITIL, ServiceNow, Incident/Problem/Change Management **Messaging:** SMTP infrastructure (adjacent)

Security: SAST/DAST/IAST, SonarQube, JFrog Artifactory, SOX/GDPR compliance **Databases:** SQL Server, Oracle, SAP HANA (operations)
