● Hyderabad, India

*20-year SRE and platform engineering leader governing reliability of mission-critical financial infrastructure at enterprise scale. Defined SLIs/SLOs, deployed Dynatrace and Splunk observability, and instituted blameless postmortem culture across ADP, Charles Schwab, BMO, and RBC.*

*Drives self-healing automation, chaos engineering, and NFR-first design through Python, Ansible, Keptn, and multi-cloud platforms.*

## ■ Core Competencies

SLI / SLO Definition & Error Budget Management

Incident Management & Blameless Postmortems

Observability Platforms (Dynatrace / Splunk)

Self-Healing & Automation Engineering

Chaos Engineering & Fault Tolerance Design

NFR Ownership & Operational Readiness

Capacity Planning & Performance Optimization

SRE Culture & Team Development

## ⚙️ Technical Skills

### Observability & AIOps

Dynatrace, Splunk (ITSI), Prometheus, Grafana, MS AppInsights, AppDynamics, Telegraf

### Automation & SRE Tooling

Python, Go, Ansible, Bash, PowerShell, Keptn (Chaos Engineering), Self-Healing Frameworks

### Cloud & Infrastructure

AWS (SA Certified), Azure (AZ-305 Expert), Kubernetes (CKAD), Terraform, Docker, Helm

### CI/CD & IaC

AWS CDK, GitHub Actions, Jenkins, UrbanCode, Bitbucket, IaC pipelines

### ITSM & Reliability

ServiceNow, ITIL, SLI/SLO, Error Budgets, DORA Framework, Incident / Problem / Change

### Capital Markets Domain

Trading Operations, Mainframe (JCL), FinTech (ADP, RBC, BMO, Schwab), SOX/GDPR

## 👤 Work Experience

### IRIS Software

Sep 2020 - Present

#### Sr. Specialist - SRE Lead, Cloud Platform & Reliability Engineering

Hyderabad, India | Clients: ADP, Charles Schwab, BMO

- + Defined and governed **SLOs and SLIs** across multi-client cloud platforms (ADP, Schwab, BMO) -- establishing error budgets and reliability thresholds aligned to business commitments, with Dynatrace-backed alerting for SLO burn-rate violations.
- + Deployed **Dynatrace** alongside Prometheus/Grafana across ADP's full-stack platform -- enabling real-time alerting, root cause analysis, proactive bottleneck identification, and shift from reactive to predictive operations.
- + Led **incident response and postmortem programmes** for ADP SRE -- instituted blameless postmortem culture, automated remediation workflows using Ansible and Python, and structured RCA practices, reducing MTTR by 40%+.
- + Developed **self-healing automation** via Ansible runbooks triggered by Dynatrace alerts -- automating detect-diagnose-remediate loops for known failure patterns and reducing on-call toil by 40%.
- + Established **Chaos Engineering** using Keptn for ADP SRE -- proactively injecting faults to identify failure modes before peak periods, hardening platform reliability under real-world failure conditions.
- + Scaled GCC SRE teams: ADP from **4 to 40 engineers**; built Charles Schwab's 18-member Platform Engineering team from ground up with foundational SRE practices, on-call frameworks, and incident governance.
- + Conducted **quarterly enterprise-wide SRE training** for up to 200 participants per 20-hour session -- scaling SRE culture and reliability practices across the engineering organisation.
- + Presented **reliability strategies, SRE metrics, and incident outcomes** directly to VP and C-suite stakeholders at ADP, Schwab, and BMO.

### IRIS Software

Jun 2018 - Sep 2020

#### Automation Technology Specialist - SRE & DevSecOps

Toronto, Canada | Client: Royal Bank of Canada Insurance

- + Established **SRE principles and DORA framework** across RBC -- introduced Deployment Frequency, Lead Time, Change Failure Rate, and MTTR as primary engineering health metrics across 250+ applications.
- + Implemented **Splunk-based log aggregation** and alerting pipelines integrated with CI/CD workflows -- enabling proactive detection and rapid response to production incidents.
- + Governed **ITIL Incident, Problem, and Change Management** across 250+ banking applications -- standardising RCA workflows, enforcing SOX/GDPR compliance, and maintaining audit-ready change transparency.
- + Designed the **Robo Deployment Framework** -- self-service CI/CD for 250+ applications; reduced application onboarding from 5 weeks to 5 hours (98% reduction); embedded compliance-as-code for SOX audit.

## Education

- o **Masters in Artificial Intelligence** 2024  
Woolf University
- o **General Management Program (GMP)** 2022  
ISB Hyderabad
- o **M.Sc in Computer Science** 2002  
Osmania University
- o **B.Sc in Electronics** 2000  
Kakatiya University

## ◆ Certifications

- + Certified SRE (iSRE)
- + ITIL Certificate in IT Service Operations
- + AWS Certified Solutions Architect - Associate
- + Azure Solutions Architect Expert (AZ-305)
- + Certified Kubernetes Application Developer (CKAD)
- + AI-102: Azure AI Solution Design
- + DP-100: Data Science on Azure
- + PMI Agile Certified Professional (PMI-ACP)
- + 6 Sigma Yellow Belt

## IRIS Software

Feb 2017 - Jun 2018

### Automation Architect - Capital Markets & Infrastructure

Toronto, Canada | Clients: Insurance & Capital Markets

- + Delivered **JCL Mainframe automation** and trading operations monitoring for Capital Markets -- automating 80+ applications and 250+ components across Java, Kafka, Salesforce, and Mainframe stacks.
- + Designed fault-tolerant, container-orchestrated deployment pipelines using **Kubernetes and Helm**, enabling zero-downtime rollouts across capital markets platforms.

## TechMahindra

Jul 2015 - Feb 2017

### Technology Manager

Noida, India | Client: Adobe

- + Delivered **zero-downtime data centre migration** for Adobe -- owned full plan, execution, and cutover of all production workloads with no service disruption.
- + Led SAP HANA upgrades and end-to-end data migration (Informatica to SQL Server 2012): schema redesign, ETL re-engineering, and enterprise-scale data validation.

## Microsoft Corporation

Jul 2007 - Dec 2014

### Sr. SDET - Production Engineering & NFR Ownership

India | Sales & Marketing Platforms (US, EMEA, APAC)

- + Held full mandate for **non-functional requirement (NFR) ownership** -- accountable for performance, availability, scalability, and security of Sales & Marketing platforms serving tens of thousands of users across US, EMEA, and APAC, sustaining **99.99% uptime over 7 years**.
- + Managed **production incident response** end-to-end: RCA, infrastructure administration (Windows/Linux), cross-team coordination, and zero customer-impacting incident record maintained over sustained period.
- + Built QA automation frameworks integrated with CI/CD pipelines, eliminating manual testing bottlenecks and supporting **200% user growth** with no degradation in reliability.

## Semantic Space Technologies

Jan 2005 - Jun 2007

### Senior Software Testing Engineer

India | Client: CFC / Bank of America

- + Sole L3 Analyst for Statusmart application (3,000+ sales users); led release management, L2/L3 incident support, and ETL development (SSIS, SQL Server, Oracle) for a US banking client.

## Key SRE Delivery Highlights

---

### **ADP SRE Observability Platform** SLI/SLO / Dynatrace

Deployed Dynatrace + Prometheus/Grafana full-stack observability for ADP's enterprise platform. Defined SLOs/SLIs with error budget burn-rate alerts. Ansible self-healing automation triggered by Dynatrace. Result: MTTR -40%, reactive-to-predictive ops model, SLO reporting adopted by C-suite.

### **ADP Chaos Engineering Programme (Keptn)** Chaos Engineering / Fault Tolerance

Established chaos engineering practice using Keptn for ADP SRE. Proactively injected faults in pre-production to surface failure modes before peak periods. Discovered 3 previously unknown failure scenarios; hardened platform reliability before each major release cycle.

### **RBC Splunk Observability + DORA Programme** Splunk / DORA / Incident Governance

Deployed Splunk log aggregation integrated with CI/CD across 250+ RBC applications. Implemented DORA framework (Deployment Frequency, Lead Time, CFR, MTTR) as primary engineering health metrics. Enforced SOX/GDPR-compliant change governance across 60+ teams.

### **Microsoft 7-Year NFR Ownership (99.99% Uptime)** NFR / Operational Readiness

Held sole accountability for all non-functional objectives (availability, performance, scalability, security) for Microsoft Sales & Marketing platforms across US, EMEA, and APAC -- sustaining 99.99% uptime over 7 years, serving tens of thousands of users with zero customer-impacting incidents.
