PROFESSIONAL SUMMARY

AI transformation and quality engineering leader with 20+ years driving large-scale technology adoption across global banking and enterprise platforms. Career rooted in quality engineering - 7 years as Sr. SDET at Microsoft owning production reliability for platforms serving US, EMEA, and APAC - evolved into SRE leadership, AI adoption, and program delivery at FinTech scale. Proven track record deploying AI-powered workflows into production (GenAI assistants at BMO, AIOps automated remediation at ADP), executing transformation programmes that eliminate toil at scale (10,000+ manual hours annually), and governing distributed engineering teams across geographies. Seeking to bring this rare combination of quality engineering depth and AI transformation execution to Battlefield QV at EA.

CORE COMPETENCIES

AI Transformation & Adoption

Quality Engineering Leadership

AI-Powered Workflow Design

Program & Portfolio Management

Distributed Team Leadership

Executive Stakeholder Engagement

Vendor & Partner Governance

Continuous Improvement & Efficiency Metrics

WORK EXPERIENCE

IRIS Software

Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India (Clients: ADP, Charles Schwab, BMO)

- AI adoption in production:** Designed and deployed GenAI-based assistants on AWS Bedrock and Azure for BMO - enabling risk summarisation and interactive Q&A via BCRG and LTS pipelines, reducing manual analysis effort and accelerating insights in a compliance-regulated environment.
- AIOps transformation:** Deployed Prometheus, Grafana, and Dynatrace for full-stack observability at ADP, enabling AIOps-driven automated remediation via Ansible - converting reactive operations to predictive, self-healing workflows and reducing MTTR by **40%+**.
- AI adoption enablement:** Led exploration of Generative AI adoption within engineering teams at IRIS and BMO - evaluating AI-assisted development platforms and productivity tools to accelerate software delivery and quality outcomes.
- Owned planning, execution, governance, and reporting across multi-client transformation portfolios (ADP, Charles Schwab, BMO) - presenting reliability strategies, SRE metrics, and AI outcomes directly to VP and C-suite stakeholders.
- Scaled ADP's SRE organisation from **4 to 35 engineers** across India, Canada, and the US - embedding structured on-call standards, SLO governance, and blameless postmortem culture across the engineering organisation.
- Built Charles Schwab's 18-member Platform Engineering team from the ground up, establishing reliability reviews, quality gates, and release governance.
- Governed MSP and vendor delivery quality through operational scorecards, SLA tracking, and structured escalation/remediation frameworks - maintaining accountability for quality and execution across external partners.
- Delivered **modeas** - automation platform handling 200+ builds/deployments per hour, eliminating 10,000+ manual operational hours annually and improving delivery velocity by 600%.

Microsoft Corporation

Jul 2007 - Dec 2014

Sr. SDET - Quality Engineering & Production Operations | India (US, EMEA, APAC platforms)

- **Quality engineering ownership:** Held dual mandate as Sr. SDET and production engineering owner - accountable for the complete quality and operational lifecycle of Sales & Marketing platforms serving tens of thousands of users across US, EMEA, and APAC subsidiaries over 7 years.
- Defined and enforced all non-functional quality objectives (performance, availability, scalability, security) across network, infrastructure, and application tiers - achieving sustained **99.99% uptime**.
- Built QA automation frameworks integrated with CI/CD pipelines - embedding automated regression, service virtualisation, and performance testing into release gates, eliminating manual testing bottlenecks and accelerating release confidence.
- Partnered with product and infrastructure teams in Agile delivery to define quality targets, manage error budgets, and align quality objectives to global sales operations outcomes.
- Modernised platforms through cloud migration and self-healing architectures, supporting **200% user growth** with no degradation in quality coverage or platform reliability.

IRIS Software

Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada (Client: Royal Bank of Canada Insurance)

- Designed and delivered the **Robo Deployment Framework (RDF)** - a PowerShell-native CI/CD orchestration platform eliminating manual delivery effort across 250+ applications; reduced onboarding from 5 weeks to 5 hours (**98% reduction**).
- Governed enterprise-wide change management and vulnerability remediation across 250+ applications - enforcing SOX/GDPR compliance and maintaining audit-ready change transparency.
- Established SRE principles and observability standards within RBC's DevSecOps programme - introducing incident classification frameworks and reliability-focused deployment gates across 250+ applications.
- Implemented Splunk-based log aggregation and alerting pipelines enabling proactive detection and rapid response to production incidents.

IRIS Software

Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada (Insurance & Capital Markets)

- Led RPA and intelligent process automation delivery - automating 80+ applications and 250+ components across heterogeneous stacks, pioneering Cognitive Process Automation (CPA/IPA) through the Robotics Market Street programme.
- Designed fault-tolerant, container-orchestrated deployment pipelines using Kubernetes and Helm enabling zero-downtime rollouts across capital markets platforms.

TechMahindra

Jul 2015 - Feb 2017

Technology Manager | Noida, India (Client: Adobe)

- Architected and delivered zero-downtime business application migration during Adobe's data centre relocation - owned full plan, execution, and cutover across all production workloads.
- Led SAP HANA upgrades, SQL Server migrations, and ETL re-engineering at enterprise scale with minimal service disruption.

Semantic Space Technologies

Jan 2005 - Jun 2007

Senior Software Testing Engineer | India (Client: Bank of America)

- Sole L3 analyst for Statusmart application serving 3,000+ Bank of America sales team members - incident management, QA (smoke/DB/integration testing), ETL development (SSIS), defect management via Remedy.

KEY PROJECTS

BMO GenAI Risk Assistants AI Adoption in Production

Designed and deployed production GenAI assistants on AWS Bedrock and Azure for BMO - enabling risk summarisation and interactive Q&A via BCRG and LTS banking workflows. Delivered in a compliance-regulated environment with SLA commitments, reducing manual analysis effort and accelerating insights for risk teams. First AI-powered workflow integration at this BMO division.

AWS Bedrock · Azure OpenAI · Python · API integration · compliance governance

ADP SRE AI-Powered Operations Transformation AIOps & Workflow Automation

Built ADP's SRE operations from 4 to 35 engineers. Deployed AIOps-driven automated remediation via Dynatrace + Ansible - converting reactive manual operations to AI-powered predictive workflows. Instituted blameless postmortem culture and SLO governance. Result: MTTR reduced by 40%+; zero repeat P1s in 18 months; executive-level reliability reporting established.

Dynatrace · Ansible · Prometheus · Grafana · ServiceNow · ITIL

modeas - Operational Efficiency Platform Toil Elimination at Scale

Enterprise automation platform handling 200+ builds/deployments per hour across banking client environments - eliminating 10,000+ manual operational hours annually and improving delivery velocity by 600%. Built success metrics and accountability mechanisms to track value creation; outcomes reported to VP and C-suite stakeholders quarterly.

Python · Ansible · Terraform · AWS · Azure · Kubernetes · Prometheus

EDUCATION

Masters in Artificial Intelligence - Woolf University	2024
General Management Program (GMP) - ISB Hyderabad	2022
M.Sc in Computer Science - Osmania University	2002

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate (AI-102)	Microsoft	
Microsoft Certified: Azure Data Scientist Associate (DP-100)	Microsoft	
Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	Microsoft	2026
AWS Certified Solutions Architect - Associate (SAA-C01)	Amazon Web Services	2026
Google Cloud Certified - Professional Cloud Architect (PCA)	Google	2026
Certified Kubernetes Application Developer (CKAD)	CNCF	2025
Certified SRE (iSRE)	iSRE Institute	
PMI Agile Certified Professional (PMI-ACP)	PMI	

SKILLS

- AI & ML:** GenAI (AWS Bedrock, Azure OpenAI), AIOps, MLOps, AI-powered workflow design, LLM integration
- Quality Engineering:** QA automation frameworks, CI/CD quality gates, service virtualisation, performance testing, regression automation
- Cloud & Platform:** AWS, Microsoft Azure, Kubernetes, Docker, Helm, Terraform, AWS CDK, Ansible
- Observability:** Dynatrace, Prometheus, Grafana, Splunk, MS Application Insights, AppDynamics
- Programme Delivery:** Portfolio management, OKRs, success metrics, vendor governance, distributed team leadership
- Automation:** Python, Ansible, PowerShell, Bash, Jenkins, Azure DevOps, GitHub Actions
- ITSM:** ITIL, ServiceNow, Incident/Problem/Change Management
