PROFESSIONAL SUMMARY

SRE leader with 20+ years architecting fault-tolerant, massively distributed systems for global financial institutions. Specialist in SLI/SLO governance, error budget management, and blameless postmortem culture -- scaled SRE organisations from 4 to 40 engineers and reduced MTTR by 40%+ via AIOps-driven automated remediation across Prometheus, Grafana, and Dynatrace. Architected RAG-based GenAI assistants on AWS Bedrock to automate incident response summarisation and dynamic runbook generation, directly applying prompt engineering to eliminate toil at BMO. Deep expertise in Kubernetes, Terraform IaC, canary deployment automation, and AWS/GCP cloud platforms -- with a track record of influencing VP and C-suite stakeholders on reliability strategy and digital resilience.

CORE COMPETENCIES

SLI/SLO Design & Error Budget Management

Fault-Tolerant Distributed Systems

Observability Engineering (Prometheus · Grafana · Dynatrace)

RAG Architectures & Prompt Engineering for SRE

Kubernetes · Docker · Terraform IaC

Complex Incident Management & Blameless Postmortems

Toil Elimination & Canary Deployment Automation

SRE Team Leadership & Executive Stakeholder Engagement

WORK EXPERIENCE

IRIS Software

Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India · Clients: ADP, Charles Schwab, BMO

- Defined and governed **SLOs, SLIs, and error budgets** across multi-client cloud platforms (BMO, ADP, Charles Schwab) -- establishing reliability thresholds aligned to business commitments and board-level resilience objectives.
- Led **complex incident response and blameless postmortem programmes** for ADP SRE -- implemented Ansible/Python automated remediation workflows, reducing MTTR by 40%+ through systematic RCA and long-term preventative measures.
- Designed full-stack **observability platform** (Prometheus, Grafana, Dynatrace) across ADP's distributed systems -- enabling real-time alerting, distributed tracing, high-volume log aggregation, and proactive capacity planning insights.
- Architected **RAG-based GenAI assistants on AWS Bedrock** for BMO -- automated incident response summarisation, risk Q&A, and dynamic runbook generation via prompt engineering, eliminating manual analysis toil across BCRG/LTS pipelines.
- Scaled ADP's SRE organisation from **4 to 40 engineers** across three countries -- mentored senior/staff-level engineers, built on-call leadership frameworks, and presented reliability strategies to VP and C-suite stakeholders at ADP, Schwab, and BMO.
- Established **Chaos Engineering (Keptn)** and canary release CI/CD pipelines via Terraform IaC and Jenkins/GitHub Actions -- hardening platform fault tolerance and improving release velocity to 99.9% operational resilience.
- Delivered **modeas** high-throughput deployment platform (200+ builds/hr) and AWS cloud migration for BMO (ECS Fargate + Lambda, HA/DR, FinOps) -- eliminating 10,000+ manual hours annually through toil automation.

IRIS Software

Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada · Client: Royal Bank of Canada

- Established **SRE principles within RBC's DevSecOps programme** -- introduced SLI frameworks, observability standards, and reliability-focused deployment gates across 250+ applications; inducted DORA framework via Azure DevOps driving measurable improvement in Deployment Frequency, MTTR, and Change Failure Rate.
- Implemented **Splunk high-volume log aggregation** pipelines integrated with CI/CD -- enabled distributed log analysis, proactive incident detection, and rapid root cause identification at enterprise scale.
- Designed the **Robo Deployment Framework** -- self-service CI/CD orchestration for 250+ apps; reduced onboarding from 5 weeks to 5 hours (98%); automated Python/Ansible artifact pipelines with SOX/GDPR-compliant change governance.

IRIS Software

Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada · Clients: Insurance & Capital Markets

- Designed **fault-tolerant, Kubernetes/Helm-orchestrated deployment pipelines** enabling zero-downtime rollouts across capital markets; led RPA practice (80+ apps, 250+ components) and pioneered Cognitive Process Automation (CPA/IPA) beyond rules-based automation.

Microsoft Corporation

Jul 2007 - Dec 2014

Senior SDET - QA, Automation & Production Engineering | India

- Dual mandate as Sr. SDET and Production Engineering owner for mission-critical Sales & Marketing platforms across US, EMEA, and APAC -- owned SLI targets, on-call incident response, RCA, and infrastructure administration (Windows/Linux) achieving **99.99% uptime sustained over 7 years** with zero customer-impacting incidents.
- Built CI/CD-integrated QA automation frameworks with performance testing and service virtualisation; modernised platforms via cloud migration and self-healing architectures supporting 200% user growth with no reliability degradation.

Earlier: TechMahindra (Adobe) · Semantic Space (Bank of America) · DRDO

2002 - 2017

Technology Manager / L3 Analyst / Software Consultant

- Zero-downtime data centre migration and SAP HANA upgrades at Adobe; L3 production support for 3,000+ user financial platform at CFC/Bank of America; defence-grade systems consulting at DRDO.

KEY PROJECTS

ADP SRE Scale-Up & Observability Platform FinTech · AIOps

Scaled SRE org 4 to 40 engineers; full-stack observability (Prometheus, Grafana, Dynatrace); 40%+ MTTR reduction via Ansible automation, Chaos Engineering (Keptn), and blameless postmortem culture.

Prometheus · Grafana · Dynatrace · Ansible · Keptn · AWS · Kubernetes

BMO RAG-Based GenAI Incident Automation RAG · Prompt Engineering

RAG-based GenAI assistants on AWS Bedrock automating incident response summarisation, dynamic runbook generation, and risk Q&A for BMO -- prompt engineering applied to eliminate manual toil across BCRG/LTS pipelines.

AWS Bedrock · RAG Architectures · Prompt Engineering · Python · Lambda

modeas & Robo Deployment Framework Toil Elimination · CI/CD

modeas: 200+ builds/hr, 10,000+ manual hours eliminated annually, 600% deployment cadence improvement. Robo DF (RBC): 250+ apps, onboarding 5 weeks to 5 hours, Splunk-integrated log pipelines, SOX/GDPR-compliant change governance.

Jenkins · Terraform · Kubernetes · Ansible · Splunk · Azure DevOps · GitHub Enterprise

EDUCATION

Masters in Artificial Intelligence · Woolf University

2024

General Management Program (GMP) · ISB Hyderabad

2022

M.Sc in Computer Science · Osmania University

2002

CERTIFICATIONS

Certified SRE (iSRE) · Certified Kubernetes Application Developer (CKAD) · CNCF

2025

AWS Certified Solutions Architect - Associate · AWS · Google Cloud Professional Cloud Architect · Google

2026

Azure Solutions Architect Expert (AZ-305) · Azure AI Engineer Associate (AI-102) · Microsoft

2026

ITIL Certificate in IT Service Operations · PMI Agile Certified Professional (PMI-ACP)

SKILLS

Cloud: AWS, GCP, Azure · Kubernetes, Docker, Helm, ECS Fargate

IaC & CI/CD: Terraform, AWS CDK, Ansible · Jenkins, GitHub Actions, GitLab, Azure DevOps

Observability: Prometheus, Grafana, Dynatrace, Splunk, AppInsights, Telegraf

GenAI/AIOps: AWS Bedrock, RAG Architectures, Prompt Engineering, MLOps

Reliability: SLI/SLO, Error Budgets, Chaos Engineering (Keptn), ITIL, DORA Languages: Python, Go, Bash, PowerShell, Groovy, C#
