

Pavan Kumar Nayakanti

Platform Engineering Leader | Internal Developer Platform | GCP | Kubernetes | DevEx

+91-9440493097 | pavan.nayakanti@hotmail.com | linkedin.com/in/pavan-nayakanti | Hyderabad, India

SUMMARY

20+ year platform engineering leader who builds Internal Developer Platforms that make engineering teams faster - from self-service golden paths and CI/CD automation to multi-region cloud architecture on GCP and AWS. Track record of scaling distributed teams from 4 to 40+ engineers, eliminating 10,000+ manual operational hours annually through developer productivity platforms, and delivering 99.9%+ availability at banking-grade SLA. GCP Professional Cloud Architect and Kubernetes (CKAD) certified; experienced in FinOps, Infrastructure-as-Code (Terraform), DevSecOps, and adopting AI/ML capabilities across platform services.

KEY ACHIEVEMENTS

Internal Developer Platform
Reduced app onboarding from 5 weeks to 5 hours (98%) via self-service CI/CD golden paths; adopted by 60+ teams across 250+ apps (RBC).

Developer Productivity Platform
Built modeas: 200+ deployments/hour, 10,000+ manual hours eliminated annually, 600% improvement in deployment cadence (ADP).

Platform Team at Scale
Scaled SRE/Platform org from 4 to 40 engineers across India, Canada, and US; reduced MTTR 40%+ through AIOps-driven automated remediation.

Cloud Architecture & FinOps
Architected HA + DR cloud infrastructure on AWS (ECS Fargate/Lambda via CDK); led FinOps program reducing cloud waste across BMO's AWS estate.

EXPERIENCE

Sr. Specialist - Cloud Practice & SRE Lead

IRIS Software - India

Sep 2020 - Present | Clients: ADP, Charles Schwab, BMO

- Architected **Cloud Platform Maturity Index (CPMI)** - a Platform-as-a-Product enabling self-service infrastructure assessment and DevOps maturity tracking, deployed across three enterprise clients (ADP, Charles Schwab, BMO).
- Built **modeas** - Internal Developer Platform handling 200+ builds/deployments per hour; standardized CI/CD golden paths eliminating 10,000+ manual operational hours annually and improving deployment cadence by 600%.
- Led **CI/CD standardization and Terraform-driven Infrastructure-as-Code** across BMO's cloud estate; implemented self-healing deployment pipelines with automated quality and security gates.
- Executed **GCP landing zone preparation and workload migration POCs for Charles Schwab** - evaluated GCP-native services and Kubernetes-based deployments for cloud-native workloads across merged TD Ameritrade and Schwab environments.
- Deployed **Prometheus, Grafana, and Dynatrace** for full-stack observability across ADP's platform: real-time alerting, distributed tracing, and root cause analysis at scale.
- Reduced **MTTR by 40%+** through AIOps-driven automated remediation (Ansible + Python); instituted blameless postmortem culture across 35-member SRE organization.
- Scaled ADP's SRE/Platform organization from **4 to 40 engineers** across India, Canada, and US; built Charles Schwab's 25-member Platform Engineering team from the ground up.
- Deployed **GenAI AI Platform on AWS Bedrock for BMO**: LLM-powered risk summarisation, Q&A interfaces, and BCRG/LTS pipelines - consolidating fragmented AI initiatives into shared platform infrastructure.
- Drove **AWS FinOps program for BMO**: rightsizing, obsolete resource identification, and tagging governance - reducing cloud waste and improving cost visibility across the AWS estate.
- Governed SLOs, SLIs, and error budgets across three global banking clients; presented reliability strategies and platform roadmaps directly to VP and C-suite stakeholders at ADP, Charles Schwab, and BMO.

Automation Technology Specialist

[IRIS Software - Toronto, Canada](#)

Jun 2018 - Sep 2020 | Client: Royal Bank of Canada Insurance

- Designed and delivered the **Robo Deployment Framework** - an Internal Developer Platform (IDP) enabling self-service CI/CD for 250+ applications across 60+ teams; reduced application onboarding from **5 weeks to 5 hours (98% reduction)**.
- Migrated **250+ applications across 60+ teams** from CA SCM/Harvest to GitHub Enterprise, enabling self-service provisioning, modern CI/CD, and developer-first workflows at scale.
- Established SRE principles within RBC's DevSecOps programme: observability standards, reliability-focused deployment gates, and incident classification frameworks across 250+ applications.
- Enabled **SAST, DAST, and IAST scanning** as core DevSecOps pipeline controls - SonarQube, Jenkins, JFrog Artifactory, and GitHub integrated for shift-left security and code quality enforcement.
- Inducted **DORA framework** across RBC using Azure DevOps - Deployment Frequency, Lead Time for Changes, Change Failure Rate, and MTTR as primary engineering health metrics.

Automation Architect

[IRIS Software - Toronto, Canada](#)

Feb 2017 - Jun 2018 | Clients: Insurance & Capital Markets

- Designed fault-tolerant, **container-orchestrated deployment pipelines using Kubernetes and Helm**, enabling zero-downtime rollouts across capital markets platforms.
- Led RPA practice delivery - automating 80+ applications and 250+ components across heterogeneous stacks; built Python-based automation frameworks for enterprise-scale regulated delivery.

Technology Manager

[TechMahindra Pvt. Ltd. - Noida, India](#)

Jul 2015 - Feb 2017 | Client: Adobe

- Led enterprise **data platform modernization for Adobe**: ETL re-engineering from Informatica to SQL Server, schema redesign, and zero-downtime data centre migration.
- Architected and delivered zero-downtime business application migration during Adobe's data centre relocation - owned full plan, execution, and cutover across all production workloads.

Sr. SDET - QA, Automation & Production Engineering

[Microsoft Corporation - India](#)

Jul 2007 - Dec 2014 | Sales & Marketing Platforms (US, EMEA, APAC)

- Owned full quality and operational lifecycle of Sales & Marketing platforms serving tens of thousands of users globally; sustained **99.99% uptime over 7 years** through automation, incident response, and proactive reliability engineering.
- Built QA automation frameworks integrated with CI/CD pipelines; managed production operations end-to-end including incident response, RCA, and infrastructure administration across Windows and Linux.

Senior Software Testing Engineer

[Semantic Space Technologies - India](#)

Jan 2005 - Jun 2007

- L3 Analyst for Statusmart application supporting 3,000+ sales team members at CFC (Bank of America); owned release management, QA, and ETL development using SSIS.

Software Consultant

[Defense Electronics Research Laboratory \(DRDO\) - India](#)

Oct 2002 - Dec 2004

- Software consulting and systems development for defence-grade applications requiring high reliability and security standards.

EDUCATION

Masters in Artificial Intelligence

[Woolf University](#)

2024

General Management Program (GMP)

[ISB Hyderabad](#)

2022

M.Sc in Computer Science

[Osmania University](#)

2002

CERTIFICATIONS

Google Cloud Certified - Professional Cloud Architect (PCA)

Google Cloud - 2026

Certified Kubernetes Application Developer (CKAD)

CNCF - 2025

AWS Certified Solutions Architect - Associate (SAA-C01)

Amazon Web Services - 2026

Microsoft Certified: Azure Solutions Architect Expert (AZ-305)

Microsoft

Certified SRE (iSRE)

DevOps Institute

PMI Agile Certified Professional (PMI-ACP)

Project Management Institute
