PROFESSIONAL SUMMARY

DevOps and platform architecture leader with 22+ years designing, building, and scaling automated delivery platforms for global financial services organisations. Expert in CI/CD pipeline engineering, Infrastructure as Code, cloud platform architecture, and multi-team delivery coordination -- with a track record of shipping internal platforms as products at scale. Built and led engineering teams of up to 35 across ADP, Charles Schwab, BMO, and RBC -- established DevOps standards and processes across 250+ enterprise applications, drove DevOps transformation and cloud migration programmes in heavily regulated environments. Combines deep technical expertise in platform engineering with the leadership and coaching capability to align engineering squads under a unified platform roadmap. Certified in Azure Solutions Architecture, CKAD, AWS SA, and AI solution design; holds a Master's in Artificial Intelligence and ISB General Management Program.

CORE COMPETENCIES

DevOps Platform Architecture & Engineering

Platform as a Product -- Roadmap & Delivery

Infrastructure as Code (Terraform / Ansible)

Cloud Platforms (AWS / Azure)

CI/CD Pipeline Engineering

Multi-Team Delivery Coordination

Engineering Standards & Governance

Team Leadership, Mentoring & Coaching

WORK EXPERIENCE

IRIS Software

Sep 2020 -- Present

Sr. Specialist -- Cloud Practice & SRE Lead | Clients: ADP, Charles Schwab, BMO

- Designed and delivered **modeas** -- a self-service DevOps deployment platform processing **200+ builds/deployments per hour** -- as an internal product with a defined roadmap, SLAs, and adoption metrics. Eliminated 10,000+ manual operational hours annually; improved deployment cadence by **600%** across major banking clients.
- Led DevOps transformation and cloud migration for BMO -- designed IaC-driven CI/CD pipelines for .NET applications on AWS ECS Fargate via CDK, with High Availability and Disaster Recovery built into the architecture from day one.
- Architected the Cloud Platform Maturity Index (CPMI) -- a standards and governance framework that benchmarked DevOps capability, build/release process maturity, and cloud readiness across ADP, Schwab, and BMO. Directly influenced technology roadmaps at VP and C-suite level.
- Built and led ADP's DevOps and SRE organisation from **4 to 35 engineers** across India, Canada, and the US -- established sprint cadence, delivery governance, coaching frameworks, and operational standards for proactive problem prevention.
- Founded and scaled Charles Schwab's **18-member Platform Engineering team** from zero -- defined engineering standards, delivery processes, and reliability reviews. Improved release reliability to 99.9%.
- Led complex technical management coordination across multiple engineering platforms simultaneously (ADP + Schwab + BMO) -- aligned cross-platform delivery, standardised CI/CD tooling, and governed engineering quality across all three programmes.
- Deployed full-stack observability (Prometheus, Grafana, Dynatrace) across ADP's platform -- enabled real-time alerting, automated remediation via Ansible and Python, and reduced MTTR by **40%+**.
- Drove proof-of-concepts for emerging technologies: GenAI assistants on Azure and AWS for BMO; AI-assisted developer tooling evaluation; AIOps exploration across client platforms.

IRIS Software

Jun 2018 -- Sep 2020

Automation Technology Specialist | Client: Royal Bank of Canada (Insurance)

- Designed and delivered the **Robo Deployment Framework** -- a PowerShell-native CI/CD orchestration platform that automated build/release pipelines for **250+ enterprise applications** across 60+ teams. Reduced application onboarding from 5 weeks to 5 hours (**98% reduction**).
- Established DevOps standards and processes for RBC's DevSecOps programme -- standardised deployment workflows, enforced SOX/GDPR compliance gates, and delivered audit-ready change evidence pipelines across a 250-application estate.
- Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub -- enabling modern CI/CD, Agile collaboration, and self-service pipeline provisioning at scale.
- Implemented Splunk-based monitoring and alerting integrated with CI/CD workflows, enabling proactive detection and rapid response to production incidents.

IRIS Software

Feb 2017 -- Jun 2018

Automation Architect | Clients: Insurance & Capital Markets

- Designed container-orchestrated deployment pipelines using **Kubernetes and Helm** for zero-downtime rollouts across capital markets platforms -- IaaS/PaaS pattern aligned to cloud hosted environment strategy.
- Led RPA practice delivery -- automated **80+ applications and 250+ components** across Java, Node.js, Kafka, Salesforce, and Mainframe stacks. Contributed to \$478K and \$180K SOW closures through automation architecture and delivery.
- Pioneered Cognitive and Intelligent Process Automation (CPA/IPA) through the Robotics Market Street programme, extending automation capability model to agent-driven workflows.

TechMahindra

Jul 2015 -- Feb 2017

Technology Manager | Client: Adobe

- Led cross-functional global engineering teams on large-scale enterprise delivery -- aligned infrastructure and application technology initiatives with business timelines and stakeholder expectations.
- Delivered zero-downtime business application migration during Adobe's data centre relocation -- owned full plan, execution, and production cutover across all workloads.
- Led SAP HANA upgrades and ETL re-engineering (Informatica to SQL Server 2012), modernising Adobe's core application stack.

Microsoft Corporation

Jul 2007 -- Dec 2014

Sr. SDET -- Platform Engineering & DevOps Automation

- Delivered platform reliability and CI/CD automation engineering for Microsoft's global marketing platforms -- achieved sustained **99.99% uptime** across a 7-year tenure through proactive monitoring and automated recovery.
- Built QA automation frameworks integrated with CI/CD pipelines -- embedded automated regression, service virtualisation, and performance testing into release gates. Supported 200% user growth with zero critical incidents.
- Partnered with product and infrastructure teams in Agile environments to define platform standards, manage error budgets, and drive continuous improvement in build/release processes.

Semantic Space Technologies

Jan 2005 -- Jun 2007

Senior Software Testing Engineer | Client: Bank of America (CFC)

- Sole L3 Analyst for the Statusmart application serving 3,000+ sales team members -- managed release management, QA, and incident triage. Developed ETLs using SSIS and managed SQL Server and Oracle DB environments.

KEY PLATFORMS & PROGRAMMES

modeas -- DevOps Deployment Platform Internal Platform Product

Designed and shipped modeas as a self-service internal platform product -- processing 200+ builds/deployments per hour with zero manual intervention. Defined product roadmap, SLAs, and adoption metrics. Eliminated 10,000+ manual operational hours per year and improved deployment cadence by 600% across major banking clients.

Kubernetes, Docker, Helm, Terraform, GitHub Actions, AWS CDK, Jenkins

Robo Deployment Framework -- RBC Insurance CI/CD Automation

Designed and delivered a PowerShell-native CI/CD orchestration platform automating build/release pipelines for 250+ enterprise applications across 60+ teams at RBC. Automated compliance evidence, access provisioning, and approval workflows. Reduced application onboarding from 5 weeks to 5 hours (98% reduction).

PowerShell, Python, Ansible, Splunk, GitHub, SSIS, Oracle, SQL Server

Cloud Platform Maturity Index (CPMI) Engineering Standards

Designed and deployed the CPMI -- a standards and governance framework measuring DevOps capability, build/release process maturity, and cloud readiness across ADP, Schwab, and BMO. Used in C-suite technology roadmap discussions; adopted as the standard for all IRIS banking clients.

Python, Terraform, Prometheus, Grafana, ServiceNow, AWS, Azure

ADP DevOps & SRE Organisation -- 4 to 35 Engineers Team Leadership

Built and scaled ADP's DevOps and SRE organisation from 4 to 35 engineers across India, Canada, and the US. Established delivery governance, Agile sprint cadence, mentoring and career development programmes, and blameless postmortem culture. Reduced MTTR by 40%+ through Dynatrace and Ansible automation.

Prometheus, Grafana, Dynatrace, Ansible, Python, Keptn (Chaos Engineering)

EDUCATION

Masters in Artificial Intelligence -- Woolf University	2024
General Management Program (GMP) -- ISB Hyderabad	2022
M.Sc in Computer Science -- Osmania University	2002

CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	2026
AWS Certified Solutions Architect -- Associate (SAA-C01)	2026
Certified Kubernetes Application Developer (CKAD)	2025
AZ-305: Designing Microsoft Azure Infrastructure Solutions AI-102: Azure AI Solution Design	2025
PMI Agile Certified Professional (PMI-ACP) Certified SRE (iSRE) ITIL Certificate in IT Service Operations	

TECHNICAL SKILLS

Cloud & DevOps: AWS, Microsoft Azure, Kubernetes, Docker, Helm, Terraform, AWS CDK, Ansible, GitHub Actions, Jenkins

CI/CD & Build/Release: Jenkins, GitHub Actions, GitLab CI, UrbanCode, ArgoCD-compatible GitOps, Robo Deployment Framework

Programming & Scripting: Python, Bash, PowerShell, Groovy, Go, C#.Net

Observability & Monitoring: Prometheus, Grafana, Dynatrace, Splunk, AppDynamics, MS AppInsights

Platform Engineering: IaC, self-healing systems, SLI/SLO, Error Budgets, Chaos Engineering (Keptn)

Emerging Tech: GenAI (Azure OpenAI, AWS Bedrock), AIOps, MLOps, RPA (UiPath, Automation Anywhere)

Delivery & Governance: Agile (SAFe, Scrum), ITIL, ITSM, ServiceNow, capacity planning, sprint estimation
