

Pavan Kumar Nayakanti

Technology Resilience & Business Continuity Leader | SRE at FinTech Scale | ISO 22301/NIST Outcomes | Multi-Cloud | Hyderabad

+91-9440493097 | pavan.nayakanti@hotmail.com | linkedin.com/in/pavan-nayakanti | Hyderabad, India

SUMMARY

Technology resilience executive with 20+ years building disaster recovery frameworks, business continuity programmes, and incident governance for global FinTech and banking clients -- ADP, Charles Schwab, BMO, and RBC. Built SRE-anchored resilience practices at regulatory scale: grew team from 4 to 40 engineers, cut MTTR by 40%+, and architected RTO/RPO-aligned DR for mission-critical financial infrastructure under SOX and GDPR. Combines engineering depth with C-suite communication -- presenting resilience strategy and risk posture to VP and board-level stakeholders across three continents.

KEY ACHIEVEMENTS

\$

MTTR -40% at FinTech Scale
Built blameless postmortem culture and AIOps-driven automated remediation across 35-engineer SRE org at ADP -- MTTR cut by over 40% with no headcount increase.

+

SRE Org: 4 to 40 Engineers
Scaled ADP resilience team from 4 to 40 across India, Canada, and the US; built Schwab's 18-member Platform Engineering team from zero in one quarter.

R

98% Reduction in Onboarding Time
Robo Deployment Framework reduced RBC application onboarding from 5 weeks to 5 hours across 250+ applications and 60+ engineering teams.

M

200+ Deployments per Hour
modeas platform eliminated 10,000+ manual ops hours annually and accelerated deployment cadence by 600% for major banking clients.

EXPERIENCE

Sr. Specialist -- Cloud Practice & SRE Lead

IRIS Software | India

Sep 2020 -- Present | Clients: ADP, Charles Schwab, BMO

- Defined and governed **technology resilience strategy**, roadmap, and policies across multi-client banking platforms (ADP, Charles Schwab, BMO) -- establishing SLOs, error budgets, and DR runbooks aligned to RTO/RPO objectives under SOX and GDPR regulatory requirements.
- Built and led **business continuity and incident governance programmes** at ADP SRE: blameless postmortem culture, AIOps-driven automated remediation (Ansible, Python, Dynatrace), and chaos engineering (Keptn) -- MTTR reduced 40%+ across 35-engineer organisation.
- Architected **RTO/RPO-aligned disaster recovery** for BMO's CCB AWS cloud migration -- HA/DR designed into the architecture from day one; automated failover via CDK/ECS Fargate; BC validated under production load.
- Designed and deployed the **Cloud Platform Maturity Index (CPMI)** -- a technology risk assessment and management framework applied across ADP, Schwab, and BMO to identify vulnerabilities, enforce mitigation strategies, and track resilience maturity improvements.
- Scaled ADP SRE from 4 to 40 engineers across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from zero -- establishing **DR review cadence, crisis management protocols**, and reliability governance.
- Managed third-party vendor resilience via operational scorecards, SLA governance, and structured escalation frameworks -- ensuring MSP delivery met enterprise continuity standards.
- Reported **technology resilience posture, incident trends, and risk status** directly to VP and C-suite at ADP, Charles Schwab, and BMO -- translating engineering metrics into business impact language for board-level audiences.
- Conducted quarterly enterprise-wide training on **technology resilience best practices** -- 200 participants per 20-hour session -- embedding business continuity culture across engineering organisations.
- Deployed full-stack observability (Prometheus, Grafana, Dynatrace) for real-time alerting, root cause analysis, and proactive detection of emerging threat and failure patterns.
- Led GenAI assistant deployment for BMO (Azure and AWS) -- risk summarisation and interactive Q&A via BCRG/LTS pipelines -- reducing manual analysis effort on critical operational data.

Automation Technology Specialist

[IRIS Software | Toronto, Canada](#)

Jun 2018 -- Sep 2020 | Client: Royal Bank of Canada Insurance

- Established **technology resilience principles** within RBC's DevSecOps programme -- observability standards, incident classification frameworks, and reliability-focused deployment gates across 250+ applications.
- Led **certificate management, vulnerability management, and automated patching governance** across 250+ RBC applications -- integrating SAST/DAST/IAST scanning, SonarQube, JFrog Artifactory, and dependency management into CI/CD pipelines.
- Implemented **DORA framework** across RBC Wealth Management and Insurance -- Deployment Frequency, MTTR, Change Failure Rate as primary engineering health metrics, driving measurable production stability improvement.
- Governed **SOX/GDPR-compliant change management** across 250+ applications, 60+ teams -- standardising deployment workflows and enforcing audit-ready change transparency across regulated environments.
- Designed and delivered **Robo Deployment Framework** -- PowerShell-native CI/CD orchestration for self-service release pipelines across 250+ applications; reduced onboarding from 5 weeks to 5 hours (98% reduction).
- Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub, enabling modern CI/CD and agile delivery at scale.

Automation Architect

[IRIS Software | Toronto, Canada](#)

Feb 2017 -- Jun 2018 | Clients: Insurance & Capital Markets

- Designed fault-tolerant, container-orchestrated deployment pipelines (Kubernetes, Helm) enabling zero-downtime rollouts across capital markets platforms.
- Led RPA practice -- automating 80+ applications and 250+ components across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe) including cognitive automation (CPA/IPA).
- Contributed to \$478K DevOps SOW and enabled \$180K Capital Markets engagement through pre-sales and delivery leadership.

Technology Manager

[TechMahindra Pvt. Ltd. | Noida, India](#)

Jul 2015 -- Feb 2017 | Client: Adobe

- Architected and executed **zero-downtime business application migration** during Adobe's data centre relocation -- owned full plan, execution, and cutover with no production impact.
- Led SAP HANA upgrades and enterprise data migration (Informatica to SQL Server 2012), covering schema redesign and ETL re-engineering at scale.

Sr. SDET -- QA, Automation & Production Engineering

[Microsoft Corporation | India](#)

Jul 2007 -- Dec 2014 | Sales & Marketing Platforms (US, EMEA, APAC)

- Held dual mandate as Sr. SDET and Production Engineering owner for business-critical Sales and Marketing platforms serving Microsoft subsidiaries across US, EMEA, and APAC.
- Sustained **99.99% uptime** over 7-year tenure -- owned all non-functional objectives (availability, scalability, security) across network, infrastructure, and application tiers.
- Owned incident response, RCA, and infrastructure operations -- zero customer-impacting incidents over a sustained period; managed on-call and cross-team escalation.
- Built QA automation frameworks integrated with CI/CD, eliminating manual testing bottlenecks and accelerating release confidence across global deployments.

EDUCATION

Masters in Artificial Intelligence

[Woolf University](#)

2024

General Management Program (GMP)

[ISB Hyderabad](#)

2022

M.Sc in Computer Science

[Osmania University](#)

2002

B.Sc in Electronics

[Kakatiya University](#)

2000

CERTIFICATIONS

Certified SRE (iSRE)

iSRE Institute

ITIL Certificate in IT Service Operations

AXELOS

Azure Solutions Architect Expert (AZ-305)

Microsoft -- 2026

AWS Solutions Architect -- Associate (SAA-C01)

Amazon Web Services -- 2026

Google Cloud Professional Cloud Architect (PCA)
