Hyderabad, India (open to Bangkok relocation)

PROFESSIONAL SUMMARY

Platform engineer and engineering leader with 20+ years building and running production infrastructure hands-on -- from writing Terraform modules and debugging production incidents to owning the full AWS and Kubernetes platform end-to-end. Built CI/CD platforms handling 200+ deployments per hour, self-service release frameworks for 250+ applications, and SLO-driven observability stacks (Prometheus, Grafana, Dynatrace) across financial services at scale. Run on-call rotations, lead incident response personally, and set engineering standards across platform teams. Moving from enterprise consulting to a product company environment to own a platform end-to-end -- design, build, operate, and improve -- with full accountability for reliability, velocity, and cost.

CORE COMPETENCIES

AWS Platform Ownership (EKS · ECS Fargate · Lambda)

Kubernetes · Docker · Helm

Terraform IaC · Infrastructure Ownership

CI/CD Design · Progressive Delivery · Rollback Strategies

Observability (Prometheus · Grafana · Dynatrace)

SLO-Driven Reliability & On-Call Operations

Hands-On Platform Engineering & Production Debugging

Engineering Standards & Team Mentorship

WORK EXPERIENCE

IRIS Software Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India · Clients: ADP, Charles Schwab, BMO

- Built and operated **modeas** -- a high-throughput CI/CD deployment platform handling 200+ builds/deployments per hour; designed progressive rollout pipelines with automated rollback, canary gates, and deployment health checks; eliminated 10,000+ manual operational hours annually and improved deployment cadence 600%.
- Owned **Terraform IaC** across ADP, Charles Schwab, and BMO AWS environments -- authored and maintained modules for networking, compute (ECS Fargate, Lambda), access controls, and multi-region deployments; enforced IaC review gates and operational best practices across all platform changes.
- Designed and operated **full-stack observability** (Prometheus, Grafana, Dynatrace) for ADP's distributed platform -- built SLO dashboards, high-volume alerting pipelines, log aggregation, and root cause analysis tooling actively used by 35+ engineers daily.
- Ran **on-call operations and incident response** for ADP SRE (35-member team) -- owned escalation paths, blameless postmortems, and Ansible-driven automated remediation; reduced MTTR by 40%+ through structured RCA and long-term preventative fixes implemented in the platform directly.
- Defined **SLOs, SLIs, and error budgets** across three banking client platforms -- set burn-rate alerting thresholds, operational readiness standards, and production change gates aligned to business reliability commitments.
- Established **Chaos Engineering (Keptn)** and canary release pipelines via Jenkins and GitHub Actions -- proactively injecting failures, identifying systemic weaknesses, and hardening platform fault tolerance before production exposure.
- Led **AWS cloud migration for BMO CCB** -- authored AWS CDK for ECS Fargate and Lambda deployments with built-in HA/DR; GCP landing zone preparation and workload migration POCs for Charles Schwab; drove AWS FinOps to eliminate unused and underutilised resources across the estate.

IRIS Software Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada · Client: Royal Bank of Canada

- Designed and built the **Robo Deployment Framework** -- a self-service CI/CD orchestration platform for 250+ enterprise applications; reduced onboarding from 5 weeks to 5 hours (98% reduction); authored Python + Ansible + PowerShell automation with SOX/GDPR-compliant change evidence pipelines and automated artifact workflows.
- Established **SRE foundations and DORA metrics** (Deployment Frequency, Lead Time, MTTR, Change Failure Rate) via Azure DevOps across RBC Wealth Management and Insurance; implemented Splunk log aggregation pipelines integrated into CI/CD for proactive incident detection.
- Governed **DevOps standards across 250+ applications and 60+ teams** -- led GitHub Enterprise migration from CA SCM/Harvest, enforced security scanning (SonarQube, JFrog Artifactory, SAST/DAST/IAST) and deployment gates across all application stacks.

IRIS Software Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada · Clients: Insurance & Capital Markets

- Designed **Kubernetes/Helm fault-tolerant deployment pipelines** enabling zero-downtime rollouts across capital markets platforms; standardised Python automation frameworks for 80+ applications across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).

Microsoft Corporation

Jul 2007 - Dec 2014

Senior SDET - QA, Automation & Production Engineering | India

- Production Engineering owner for mission-critical Sales & Marketing platforms (US, EMEA, APAC) -- personally handled on-call incident response, production debugging, RCA, and infrastructure administration (Windows/Linux); sustained **99.99% uptime over 7 years** with zero customer-impacting incidents.
- Built CI/CD-integrated QA automation frameworks with performance testing and service virtualisation; modernised platforms via cloud migration and self-healing architectures supporting 200% user growth with no reliability regression.

Earlier: TechMahindra (Adobe) · Semantic Space (Bank of America) · DRDO

2002 - 2017

Technology Manager / L3 Analyst / Software Consultant

- Zero-downtime data centre migration and SAP HANA upgrades at Adobe; L3 production support for 3,000+ user financial platform at CFC/Bank of America; defence-grade systems at DRDO.

KEY PROJECTS

modeas CI/CD Deployment Platform Platform Engineering · Delivery Velocity

Designed and built an enterprise CI/CD platform from scratch: 200+ builds/deployments per hour, progressive rollout with canary gates and automated rollback, self-healing deployment health checks. Eliminated 10,000+ manual hours annually; improved cadence 600%. Owned end-to-end: architecture, implementation, operations, and incident response.

Jenkins · GitHub Actions · Terraform · Kubernetes · Helm · Ansible · Python

Robo Deployment Framework (RBC) Self-Service Platform · IaC

Self-service CI/CD orchestration platform for 250+ enterprise applications -- reduced onboarding from 5 weeks to 5 hours (98%). Authored all automation: Python artifact pipelines, Ansible deployment workflows, PowerShell orchestration. Integrated Splunk log pipelines for incident detection; enforced SOX/GDPR-compliant change governance at scale.

Python · Ansible · PowerShell · Splunk · Jenkins · Azure DevOps · GitHub Enterprise

ADP Observability & SLO Platform Reliability Engineering · SLO

Full-stack observability platform for ADP's distributed systems: Prometheus + Grafana for SLO dashboards and burn-rate alerting, Dynatrace for APM and root cause analysis, Keptn for Chaos Engineering fault injection. Reduced MTTR 40%+ via Ansible-driven automated remediation; on-call rotations for 35-member SRE team.

Prometheus · Grafana · Dynatrace · Keptn · Ansible · AWS · Kubernetes

EDUCATION

Masters in Artificial Intelligence · Woolf University

2024

General Management Program (GMP) · ISB Hyderabad

2022

M.Sc in Computer Science · Osmania University

2002

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD) · CNCF · Certified SRE (iSRE)

2025

AWS Certified Solutions Architect - Associate · AWS · Google Cloud Professional Cloud Architect · Google

2026

Azure Solutions Architect Expert (AZ-305) · Azure AI Engineer Associate (AI-102) · Microsoft

2026

ITIL Certificate in IT Service Operations · PMI Agile Certified Professional (PMI-ACP)

SKILLS

Cloud: AWS (EKS, ECS Fargate, Lambda, CDK), GCP, Azure · Kubernetes, Docker, Helm

IaC & CI/CD: Terraform, Ansible, AWS CDK · Jenkins, GitHub Actions, GitLab, Azure DevOps

Observability: Prometheus, Grafana, Dynatrace, Splunk, AppInsights · Chaos Engineering (Keptn)

Reliability: SLI/SLO, Error Budgets, DORA, ITIL · On-Call, Incident Response, Postmortems **Languages:** Python, Go, Bash, PowerShell, Groovy

Databases: PostgreSQL, SQL Server, Oracle, SAP HANA · Redis (infra context)
