PROFESSIONAL SUMMARY

Technology resilience and DR/BC leader with 20+ years governing enterprise resilience programmes across global financial institutions. Specialist in cloud and hybrid resiliency architecture (AWS, Azure, GCP), chaos engineering, automated DR runbooks, and resilience maturity governance -- designing RTO/RPO-aligned HA/DR systems for BMO, ADP, and Charles Schwab with failover automation and audit-ready evidence pipelines. Led major incident command for a 35-member global SRE organisation, governed SOX/GDPR-compliant change documentation across 250+ applications, and deployed CPMI resilience maturity frameworks with executive KPI reporting across three tier-1 banking clients. Applied AI-enabled resilience through GenAI-powered automated DR summarisation and AIOps-driven remediation at BMO -- with a track record of executive crisis management and multi-country programme leadership across India, Canada, and the US.

CORE COMPETENCIES

Technology Resilience Strategy & Multi-Year Roadmap

Disaster Recovery & Business Continuity (DR/BC)

Cloud & Hybrid Resiliency Architecture (AWS · Azure · GCP)

Chaos Engineering & Automated Failover Testing (Keptn)

Resilience Maturity Models & Executive KPI Reporting

IaC-Driven DR Automation (Terraform · Ansible · AWS CDK)

Incident Command & Executive Crisis Management

Audit-Ready Compliance Governance (SOX · GDPR · ITIL)

WORK EXPERIENCE

IRIS Software

Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India · Clients: ADP, Charles Schwab, BMO

- Architected **RTO/RPO-aligned HA/DR infrastructure for BMO CCB** on AWS -- CDK-orchestrated ECS Fargate and Lambda with built-in High Availability, multi-region Disaster Recovery, automated failover runbooks, and recovery sequencing validated before production cutover; FinOps governance to sustain cost-efficient DR estate.
- Established **Chaos Engineering programme (Keptn) at ADP** -- proactive fault injection, failover exercises, and systemic risk scenario simulations to validate recovery capabilities and identify resilience gaps before production failure; hardened platform fault tolerance under real-world failure conditions across a distributed financial services platform.
- Deployed **CPMI (Cloud Platform Maturity Index) resilience maturity framework** across ADP, Charles Schwab, and BMO -- structured maturity assessments, executive KPI dashboards, and improvement roadmaps measuring cloud security, operational efficiency, and resilience capability maturity with board-level reporting.
- Owned **automated DR runbooks and IaC-driven orchestration** via Terraform, Ansible, and AWS CDK -- standardised recovery playbooks, automated remediation workflows, and Ansible-triggered self-healing responses reducing MTTR by 40%+ across mission-critical financial platforms.
- Led **executive incident command for ADP SRE** (35-member global team) -- structured crisis management, escalation paths, cross-team coordination, and blameless postmortems; delivered executive-level incident communications and RCA outcomes to VP and C-suite stakeholders at ADP, Charles Schwab, and BMO.
- Governed **SLOs, SLIs, and error budgets** as operational continuity standards across three banking client platforms -- burn-rate alerting, operational readiness gates, and resilience thresholds aligned to business continuity commitments and audit review requirements.
- Architected **AI-enabled resilience via GenAI assistants on AWS Bedrock** for BMO -- automated DR incident summarisation, risk Q&A, and dynamic runbook generation using RAG pipelines; AIOps-driven monitoring and anomaly detection reducing manual analysis effort and accelerating response.

IRIS Software

Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada · Client: Royal Bank of Canada

- Governed **enterprise-wide change and operational resilience across 250+ applications** -- SOX/GDPR-compliant audit-ready change evidence pipelines, structured deployment governance, and DORA metrics (Deployment Frequency, MTTR, Change Failure Rate) embedded via Azure DevOps as primary engineering health indicators.
- Implemented **Splunk log aggregation and alerting pipelines** integrated with CI/CD -- high-volume distributed log analysis for proactive incident detection, rapid root cause identification, and audit-trail documentation across RBC Wealth Management and Insurance technology estates.
- Designed the **Robo Deployment Framework** -- automated release orchestration with compliant change evidence, structured RCA workflows, and SOX-defensible audit documentation for 250+ application deployments; enabled repeatable, auditable recovery procedures at enterprise scale.

IRIS Software

Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada · Clients: Insurance & Capital Markets

- Designed **fault-tolerant Kubernetes/Helm deployment pipelines** with zero-downtime rollouts and automated failover for capital markets platforms; standardised Python automation frameworks across 80+ applications and heterogeneous technology stacks.

Microsoft Corporation

Jul 2007 - Dec 2014

Senior SDET - QA, Automation & Production Engineering | India

- Production Engineering owner for mission-critical Sales & Marketing platforms (US, EMEA, APAC) -- defined and enforced non-functional objectives (performance, availability, scalability, security); owned on-call incident response, RCA, and infrastructure administration (Windows/Linux) achieving **99.99% uptime sustained over 7 years** with zero customer-impacting incidents.
- Built CI/CD-integrated automation frameworks with performance, regression, and service virtualisation testing; modernised platforms through cloud migration and self-healing architectures supporting 200% user growth with sustained reliability standards.

Earlier: TechMahindra (Adobe) · Semantic Space (Bank of America) · DRDO

2002 - 2017

Technology Manager / L3 Analyst / Software Consultant

- Zero-downtime data centre migration and SAP HANA upgrades at Adobe; L3 production support for 3,000+ user financial platform at CFC/Bank of America; defence-grade systems consulting at DRDO.

KEY PROJECTS

BMO HA/DR Cloud Migration & Recovery Architecture DR/BC · Cloud Resilience

RTO/RPO-aligned disaster recovery architecture for BMO CCB on AWS: CDK-orchestrated ECS Fargate with multi-region HA, automated failover runbooks, recovery sequencing validated pre-cutover, and FinOps governance for cost-efficient DR estate. Built-in business continuity from architecture inception through production validation.

AWS CDK · ECS Fargate · Lambda · Terraform · Ansible · CloudWatch · Route53 Failover

ADP Chaos Engineering & Resilience Platform Chaos Engineering · SLO

Enterprise chaos engineering programme using Keptn: proactive fault injection, failover scenario simulations, and systemic risk identification across ADP's distributed financial platform. Combined with Prometheus/Grafana/Dynatrace observability, Ansible-automated remediation, and blameless postmortem culture -- reduced MTTR 40%+, on-call for 35-member SRE team.

Keptn · Prometheus · Grafana · Dynatrace · Ansible · AWS · Kubernetes

CPMI Resilience Maturity Framework Maturity Model · Executive Reporting

Cloud Platform Maturity Index (CPMI) deployed across ADP, Charles Schwab, and BMO: structured resilience maturity assessments, executive KPI dashboards, multi-year improvement roadmaps, and board-level reporting on cloud security, operational efficiency, and recovery capability maturity across tier-1 banking clients.

AWS · Azure · GCP · Terraform · ITIL · DORA · Governance Frameworks

EDUCATION

Masters in Artificial Intelligence · Woolf University	2024
General Management Program (GMP) · ISB Hyderabad	2022
M.Sc in Computer Science · Osmania University	2002

CERTIFICATIONS

Certified SRE (iSRE) · Certified Kubernetes Application Developer (CKAD) · CNCF	2025
AWS Certified Solutions Architect - Associate · AWS · Google Cloud Professional Cloud Architect · Google	2026
Azure Solutions Architect Expert (AZ-305) · Azure AI Engineer Associate (AI-102) · Microsoft	2026
ITIL Certificate in IT Service Operations · PMI Agile Certified Professional (PMI-ACP)	

SKILLS

Cloud & DR: AWS (ECS Fargate, Lambda, CDK, Route53 Failover), Azure, GCP · Multi-region HA/DR	
IaC & Automation: Terraform, Ansible, AWS CDK · Kubernetes, Docker, Helm	
Observability: Prometheus, Grafana, Dynatrace, Splunk, AppInsights · Chaos Engineering (Keptn)	
Resilience: SLI/SLO, Error Budgets, DORA, ITIL, CPMI · Incident Command, Blameless Postmortems	
Compliance: SOX, GDPR · Audit-ready change documentation · ISO 22301 (adjacent)	
AI/GenAI: AWS Bedrock, RAG, AIOps · AI-enabled resilience & automated DR summarisation	Languages: Python, Go, Bash, PowerShell, Groovy
