● Hyderabad, India

DevSecOps & Platform Engineering leader with 20+ years driving global CI/CD standardization, shift-left security (SAST/DAST/IAST), and DORA-based DevSecOps governance across regulated financial enterprises -- RBC Insurance, ADP, Charles Schwab, BMO, and Microsoft.

Core Competencies

DevSecOps Strategy & Governance

CI/CD Pipeline Standardization

Shift-Left Security (SAST/DAST/IAST)

DORA Metrics & KPI Frameworks

Azure DevOps & GitHub Enterprise

Kubernetes & Container Orchestration

IaC -- Terraform & Ansible

DevSecOps Tool Selection & ALM

Enterprise Architecture Collaboration

Org-Wide Training & Enablement

Technical Skills

DevSecOps & CI/CD

Azure DevOps, GitHub Enterprise, Jenkins, SonarQube, JFrog Artifactory, UrbanCode, SAST/DAST/IAST

Cloud & Platform

AWS, Microsoft Azure, Kubernetes, Docker, Helm, Terraform, AWS CDK, Ansible, GitLab, GitHub Actions

Scripting & Dev

Python, PowerShell, YAML, Bash, Groovy, C#.Net

Observability

Prometheus, Grafana, Dynatrace, Splunk, MS AppInsights

Governance & ITSM

ITIL, ServiceNow, SOX/GDPR compliance, Agile (PMI-ACP)

Education

• **Masters in Artificial Intelligence** 2024
Woolf University

• **General Management Program** 2022
ISB Hyderabad

• **M.Sc, Computer Science** 2002
Osmania University

Work Experience

IRIS Software

Sep 2020 -- Present

Sr. Specialist -- Cloud Practice & SRE Lead

India | Clients: ADP, Charles Schwab, BMO

- ⊕ Governed DevSecOps tooling and ALM across multi-client banking environments -- establishing standardized CI/CD frameworks across the full SDLC, tracking deployment KPIs (Deployment Frequency, Change Failure Rate, Escape Defects), and enforcing measurable quality gates for ADP, Charles Schwab, and BMO.
- ⊕ Delivered **modeas** -- an enterprise-grade CI/CD standardization platform handling 200+ builds/deployments per hour, eliminating 10,000+ manual operational hours annually and accelerating deployment cadence by 600%.
- ⊕ Led CI/CD workflow optimizations and Terraform-driven IaC implementation -- enabling self-service release pipelines and achieving 99.9% operational resilience across three major banking clients.
- ⊕ Architected the Cloud Platform Maturity Index (CPMI) and DevOps as a Service framework, driving measurable automation maturity and cloud security improvements across clients.
- ⊕ Conducted quarterly enterprise-wide DevSecOps training for up to 200 participants per 20-hour session -- scaling shift-left security practices and DevOps capability across global engineering organizations.
- ⊕ Scaled ADP's SRE organization from 4 to 40 engineers across India, Canada, and the US; reduced MTTR by 40%+ through AIOps-driven automated remediation and blameless postmortem culture.

IRIS Software

Jun 2018 -- Sep 2020

Automation Technology Specialist -- DevSecOps Lead

Toronto, Canada | Client: Royal Bank of Canada Insurance

- ⊕ Enabled **SAST, DAST, and IAST** scanning as core DevSecOps objectives -- integrating SonarQube, Jenkins, UrbanCode, JFrog Artifactory, and GitHub into CI/CD pipelines to enforce shift-left security, dependency management, and code quality gates across Java and multi-stack application workloads.
- ⊕ Inducted the **DORA framework** across RBC Wealth Management and Insurance using **Azure DevOps** -- establishing Deployment Frequency, Lead Time, Change Failure Rate, Escape Defects, and MTTR as primary engineering health metrics, driving measurable improvement in delivery performance.
- ⊕ Designed and delivered the **Robo Deployment Framework** -- a global CI/CD orchestration platform enabling self-service release pipelines for Windows services, database deployments (SSIS, Oracle, SQL Server), and enterprise application workloads; reduced onboarding from 5 weeks to 5 hours (98% reduction).
- ⊕ Established SRE principles within RBC's DevSecOps programme -- introducing observability standards, incident classification frameworks, and reliability-focused deployment gates across 250+ applications.
- ⊕ Governed enterprise-wide change management across 250+ applications -- enforcing SOX/GDPR compliance and building audit-ready change evidence pipelines via Python and Ansible automation.
- ⊕ Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub Enterprise, enabling modern CI/CD and self-service provisioning at scale.

◆ Certifications

- ⊕ Certified Kubernetes Application Developer (CKAD) -- 2025
- ⊕ Azure Solutions Architect Expert (AZ-305) -- 2026
- ⊕ AWS Solutions Architect Associate -- 2026
- ⊕ AI-102: Azure AI Solution Design -- 2025
- ⊕ PMI Agile Certified Professional (PMI-ACP)
- ⊕ Certified SRE (iSRE)
- ⊕ ITIL Certificate in IT Service Operations
- ⊕ 6 Sigma Yellow Belt (2016)

IRIS Software

Feb 2017 -- Jun 2018

Automation Architect

Toronto, Canada | Clients: Insurance & Capital Markets

- ⊕ Designed Kubernetes and Helm-based container deployment pipelines for zero-downtime rollouts across capital markets platforms.
- ⊕ Led RPA practice delivery -- automating 80+ applications and 250+ components across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).
- ⊕ Standardized Python-based automation frameworks; contributed to \$658K in SOW closures through pre-sales delivery leadership.

Microsoft Corporation

Jul 2007 -- Dec 2014

Sr. SDET -- Production Engineering

India | Sales & Marketing Platforms (US, EMEA, APAC)

- ⊕ Used Azure DevOps for enterprise-wide CI/CD orchestration -- embedding automated regression, service virtualization, and performance testing gates into global release pipelines.
- ⊕ Achieved sustained 99.99% uptime over 7 years through full-stack production ownership: incident response, RCA, infrastructure administration across Windows and Linux environments.
- ⊕ Modernized marketing platforms through cloud migration and self-healing architectures, supporting 200% user growth with no degradation in platform reliability.

TechMahindra

Jul 2015 -- Feb 2017

Technology Manager

Noida, India | Client: Adobe

- ⊕ Architected and delivered zero-downtime business application migration during Adobe's data center relocation -- owned full plan, execution, and cutover across all production workloads.
- ⊕ Led cross-functional global engineering teams on large-scale data and code migrations (Informatica to SQL Server 2012) and SAP HANA upgrades.

📁 Key Projects

Robo Deployment Framework

CI/CD Standardization

Global self-service CI/CD orchestration platform at RBC Insurance. Standardized release pipelines for Windows services, databases, and enterprise apps across 60+ teams. Reduced application onboarding from 5 weeks to 5 hours (98% reduction). Stack: PowerShell, Python, Ansible, Jenkins, Azure DevOps, GitHub Enterprise.

DevSecOps Pipeline -- SAST/DAST/IAST Enablement

Shift-Left Security

Designed and implemented end-to-end DevSecOps pipeline at RBC Insurance integrating SonarQube (SAST/code quality), DAST scanning, IAST, and JFrog Artifactory (dependency management) into Jenkins/GitHub CI/CD workflows across Java and multi-stack application portfolios.

modeas -- Enterprise CI/CD Platform

DevSecOps KPIs

High-throughput deployment standardization platform at ADP/IRIS -- 200+ builds/deployments per hour, 10,000+ manual hours eliminated annually, 600% deployment cadence improvement. Governed as enterprise ALM with Deployment Frequency and Change Failure Rate tracked via DORA metrics.

DORA Framework Implementation

DevSecOps Governance

Inducted and operationalized DORA metrics (Deployment Frequency, Lead Time, Change Failure Rate, MTTR) across RBC Wealth Management and Insurance using Azure DevOps -- establishing engineering health baselines and driving measurable improvements in production stability across 250+ applications.
