Hyderabad, India

PROFESSIONAL SUMMARY

Engineering Manager with 20+ years building enterprise DevOps, DevSecOps, and infrastructure automation platforms across global banking and FinTech organisations (ADP, RBC, Charles Schwab, BMO). Specialist in designing and maintaining CI/CD pipelines using Jenkins and GitLab, container orchestration with Kubernetes and Docker, Infrastructure as Code with Terraform and Ansible, and full-stack observability through Prometheus, Grafana, and Dynatrace. Proven at scaling multi-disciplinary engineering teams from 4 to 40 engineers while embedding DevSecOps controls -- SAST, DAST, shift-left security -- across 250+ application portfolios. Deep background in Python and Bash automation for reliable tooling, software supply chain security practices, and governing engineering maturity uplift across regulated enterprise environments.

CORE COMPETENCIES

CI/CD Platform Engineering (Jenkins - GitLab)

DevSecOps & SAST/DAST Integration

Software Supply Chain Security (SBOM)

Infrastructure as Code (Terraform - Ansible)

Container Orchestration (Kubernetes - Docker)

Observability Engineering (Prometheus - Grafana - Dynatrace)

Engineering Team Leadership & Growth

Python & Bash Automation Frameworks

WORK EXPERIENCE

IRIS Software

Sep 2020 -- Present

Sr. Specialist -- Cloud Practice & SRE Lead | India | Clients: ADP, Charles Schwab, BMO

- Led **CI/CD workflow optimisations**, **Terraform-driven IaC**, and self-healing system implementations across ADP, Schwab, and BMO platforms -- improving release velocity and operational resilience to 99.9% across client environments.
- Delivered **modeas**, a high-throughput **CI/CD deployment platform** handling 200+ builds/deployments per hour -- eliminating 10,000+ manual operational hours annually and accelerating deployment cadence by 600%.
- Architected enterprise-grade DevOps tooling including the Cloud Platform Maturity Index (CPMI) and DevOps as a Service, defining measurable **engineering maturity KPIs** across three major banking clients.
- Deployed **Prometheus** and **Grafana** alongside Dynatrace for full-stack observability across ADP's platform -- enabling real-time alerting, root cause analysis, and proactive bottleneck identification before customer impact.
- Instituted automated remediation workflows using **Ansible** and **Python** across ADP SRE, alongside blameless postmortem culture -- reducing MTTR by over 40%.
- Defined and governed SLOs, SLIs, and error budgets across multi-client cloud platforms, establishing reliability thresholds aligned to business commitments for ADP, Charles Schwab, and BMO.
- Led BMO's end-to-end AWS cloud migration delivering **AWS CDK**-enabled deployment pipelines for .NET applications across ECS Fargate and Lambda -- with High Availability and Disaster Recovery built in from day one.
- Scaled ADP's SRE organisation from 4 to 40 engineers** across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from the ground up within a quarter.
- Conducted enterprise-wide DevOps and SRE training sessions for up to 200 participants per 20-hour session; presented reliability strategies and platform outcomes directly to VP and C-suite stakeholders.

IRIS Software

Jun 2018 -- Sep 2020

Automation Technology Specialist | Toronto, Canada | Client: Royal Bank of Canada Insurance

- Enabled **SAST, DAST, and IAST scanning** as core **DevSecOps** objectives across RBC Insurance -- integrating SonarQube, Jenkins, UrbanCode, JFrog Artifactory, and GitHub into **CI/CD pipelines** to enforce **shift-left security**, dependency management, and code quality gates across 250+ application portfolios.
- Established SRE principles within RBC's DevSecOps programme, introducing observability standards, incident classification frameworks, and reliability-focused deployment gates across 250+ applications.
- Designed and delivered the **Robo Deployment Framework** -- a CI/CD orchestration platform enabling self-service release pipelines for Windows services, database deployments (SSIS, Oracle, SQL Server), and enterprise application workloads.
- Automated artifact retrieval and approval workflows using **Python** and **Ansible** -- eliminating manual intervention and establishing compliant change evidence pipelines.
- Inducted the **DORA framework** across RBC Wealth Management and Insurance via Azure DevOps -- establishing Deployment Frequency, Lead Time for Changes, Change Failure Rate, and MTTR as primary **engineering health KPIs**.
- Governed enterprise-wide DevOps and change management across 250+ applications -- standardising deployment workflows, enforcing SOX/GDPR compliance, and ensuring audit-ready change transparency.
- Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub, enabling modern CI/CD and self-service provisioning at scale. **Reduced application onboarding from 5 weeks to 5 hours (98% reduction)**.

IRIS Software

Feb 2017 -- Jun 2018

Automation Architect | Toronto, Canada | Clients: Insurance & Capital Markets

- Designed fault-tolerant, **container-orchestrated deployment pipelines using Kubernetes and Helm**, enabling zero-downtime rollouts across capital markets platforms.
- Standardised **Python-based automation frameworks** and scaled an offshore delivery team for enterprise automation across regulated insurance and capital markets domains.
- Led RPA practice delivery -- automating 80+ applications and 250+ components across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).

TechMahindra Pvt. Ltd.

Jul 2015 -- Feb 2017

Technology Manager | Noida, India | Client: Adobe

- Led cross-functional global engineering teams on large-scale enterprise delivery programmes, executing zero-downtime data centre migration and SAP HANA upgrades for Adobe with full business continuity.
- Executed end-to-end data and code migration from Informatica to SQL Server 2012, covering schema redesign, ETL re-engineering, and data validation at enterprise scale.

Microsoft Corporation

Jul 2007 -- Dec 2014

Sr. SDET -- QA, Automation & Production Engineering | India

- Held dual mandate as Sr. SDET and Production Engineering owner -- accountable for the full quality and operational lifecycle of Sales & Marketing applications serving tens of thousands of users across US, EMEA, and APAC subsidiaries.
- Built and led **QA automation frameworks** integrated with **CI/CD pipelines**, embedding automated regression, service virtualisation, and performance testing into release gates -- eliminating manual testing bottlenecks and maintaining **99.99% uptime** over a 7-year tenure.
- Owned all non-functional objectives (performance, availability, scalability, security) -- defining and enforcing **engineering standards** across network, infrastructure, and application tiers.

KEY DELIVERY HIGHLIGHTS

modeas -- High-Throughput CI/CD Deployment Platform ADP / IRIS

Architected and delivered an enterprise deployment platform handling 200+ builds/deployments per hour -- eliminating 10,000+ manual operational hours annually and accelerating deployment cadence by 600%. Combined CI/CD pipeline orchestration with observability-first design (Prometheus, Grafana, Dynatrace) and self-healing capabilities.

Jenkins - GitLab - Kubernetes - Terraform - Ansible - Prometheus - Grafana - Python

Robo Deployment Framework -- Self-Service CI/CD at RBC RBC / IRIS

Designed and delivered a CI/CD orchestration platform enabling self-service release pipelines across 250+ enterprise applications. Integrated SAST, DAST, and IAST scanning (SonarQube, JFrog Artifactory) as DevSecOps gates, enforcing shift-left security at scale. Reduced application onboarding from 5 weeks to 5 hours (98% reduction).

Jenkins - UrbanCode - GitHub - SonarQube - JFrog Artifactory - Python - Ansible - PowerShell

ADP SRE Scale-Up -- 4 to 40 Engineers ADP / IRIS

Built ADP's SRE engineering organisation from 4 to 40 engineers across India, Canada, and the US. Established full-stack observability (Prometheus, Grafana, Dynatrace), Chaos Engineering (Keptn), and Ansible + Python automated remediation workflows -- reducing MTTR by 40%+ and setting a FinTech benchmark for reliability engineering maturity.

Prometheus - Grafana - Dynatrace - Ansible - Python - Keptn - Terraform - AWS

GitHub Enterprise Migration -- 250+ Applications, 60+ Teams RBC / IRIS

Led enterprise-wide SCM migration from CA SCM/Harvest to GitHub across 250+ applications and 60+ teams, enabling modern CI/CD, agile collaboration, and self-service provisioning. Automated migration tooling in Python; established branch strategy standards and deployment governance for all post-migration teams.

GitHub Enterprise - Python - Jenkins - Azure DevOps - CI/CD governance

EDUCATION

Masters in Artificial Intelligence	Woolf University	2024
General Management Program (GMP)	ISB Hyderabad	2022
M.Sc in Computer Science	Osmania University	2002
B.Sc in Electronics	Kakatiya University	2000

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD)	2025
Google Cloud Certified -- Professional Cloud Architect (PCA)	2026
AWS Certified Solutions Architect -- Associate (SAA-C01)	2026
Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	Active
Microsoft Certified: Azure AI Engineer Associate (AI-102)	Active
Certified SRE (iSRE) ITIL(R) Certificate in IT Service Operations PMI Agile Certified Professional (PMI-ACP)	Active

TECHNICAL SKILLS

CI/CD & DevOps: Jenkins, GitLab CI/CD, GitHub Actions, Azure DevOps, UrbanCode Deploy, Docker, Kubernetes, Helm

IaC & Configuration: Terraform, Ansible, AWS CDK, Helm Charts

Programming & Scripting: Python, Bash, PowerShell, Groovy, Go, C#.Net

Observability: Prometheus, Grafana, Dynatrace, Splunk, AppDynamics, MS Application Insights, Telegraf

DevSecOps: SAST/DAST/IAST, SonarQube, JFrog Artifactory, Shift-Left Security, SOX/GDPR compliance, DORA metrics

Cloud: AWS (EC2, ECS Fargate, Lambda, Bedrock, CDK), Microsoft Azure, GCP

ITSM & Reliability: ITIL, ServiceNow, SLI/SLO/Error Budgets, Chaos Engineering (Keptn), Incident & Change Management
