Hyderabad, India

PROFESSIONAL SUMMARY

22-year SRE and platform engineering leader who has built and scaled global cloud infrastructure programmes for tier-1 financial institutions (ADP, Charles Schwab, BMO, RBC). Brings hands-on Azure architecture expertise, Terraform-driven IaC automation, and SRE practice ownership -- SLIs, SLOs, error budgets, and blameless postmortem culture -- to greenfield platform builds that process billions in financial transactions. Scaled SRE organisations from 4 to 35 engineers, cut MTTR 40%+ through AIOps-driven automated remediation, and delivered a 98% reduction in infrastructure onboarding time. Certified Azure Solutions Architect (AZ-305) and Kubernetes Application Developer (CKAD) with deep compliance-grade delivery experience (SOX/GDPR pipelines equivalent to SOC 2 / PCI DSS requirements). Seeking to apply this foundation as Director of Infrastructure at TriVinna -- building the platform from the ground up.

CORE COMPETENCIES

Cloud Infrastructure (Azure / AWS)

Infrastructure as Code (Terraform / CloudFormation)

Container Orchestration (Kubernetes / ECS / Docker)

CI/CD & GitOps Engineering

SRE Practice (SLI / SLO / Error Budgets)

Observability & Incident Management

DevSecOps & Compliance (SOC 2 / PCI DSS)

Platform Team Leadership & Mentoring

WORK EXPERIENCE

IRIS Software

Sep 2020 - Present

Sr. Specialist - Cloud Practice & SRE Lead | India | Clients: ADP, Charles Schwab, BMO

- **Architected multi-cloud IaC using Terraform across Azure and AWS**, managing self-healing system implementations and driving release velocity to 99.9% operational resilience across major banking clients.
- Designed and governed SLOs, SLIs, and error budgets across ADP, BMO, and Charles Schwab platforms -- establishing reliability thresholds aligned to business SLAs and enabling proactive incident prevention.
- Built and delivered **modeas** -- a high-throughput CI/CD platform handling 200+ builds/deployments per hour -- eliminating 10,000+ manual operational hours annually and improving deployment cadence by 600%.
- Deployed full-stack observability using Prometheus, Grafana, and Dynatrace (Datadog-equivalent tooling) -- enabling real-time alerting, SLO dashboards, and root cause analysis across distributed FinTech platforms.
- Led blameless postmortem culture and automated remediation workflows using Ansible and Python, reducing MTTR by 40%+ across ADP's production environment.
- Scaled ADP's SRE organisation from 4 to 35 engineers across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from ground up.
- Implemented ITIL-aligned incident, problem, and change management -- enforcing structured RCA workflows and measurable improvements in change success rate.
- Deployed GenAI-based assistants on Azure and AWS for BMO, enabling risk summarisation via BCRG and LTS pipelines and reducing manual analysis effort.
- Established Chaos Engineering practices using Keptn at ADP -- proactively identifying fault scenarios and hardening platform reliability under real-world failure conditions.

IRIS Software

Jun 2018 - Sep 2020

Automation Technology Specialist | Toronto, Canada | Client: Royal Bank of Canada Insurance

- Designed and delivered the **Robo Deployment Framework** -- a Kubernetes-native, technology-agnostic CI/CD orchestration platform enabling self-service release pipelines -- reducing application onboarding from 5 weeks to 5 hours (98% reduction).
- Implemented compliance pipelines meeting SOC 2 / PCI DSS equivalency standards: Python and Ansible automated approval workflows with Splunk-based audit trails -- achieving audit-ready change transparency with zero SOX exceptions across 250+ applications.
- Deployed Splunk log aggregation and alerting pipelines integrated with CI/CD workflows for proactive incident detection across 250+ applications at RBC.
- Led enterprise migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub, enabling modern CI/CD, GitOps-style workflows, and self-service provisioning at scale.
- Established SRE principles within RBC's DevSecOps programme -- introducing observability standards, incident classification frameworks, and reliability-focused deployment gates.

IRIS Software

Feb 2017 - Jun 2018

Automation Architect | Toronto, Canada | Clients: Insurance & Capital Markets

- Designed fault-tolerant, container-orchestrated deployment pipelines using **Kubernetes and Helm**, enabling zero-downtime rollouts including blue-green deployment patterns across capital markets platforms.
- Led RPA practice delivery -- automating 80+ applications and 250+ components across heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe).
- Standardised Python-based automation frameworks and scaled offshore delivery team for enterprise automation in regulated financial domains.

Microsoft Corporation

Jul 2007 - Dec 2014

Sr. SDET - Automation Architect | India

- Maintained 99.99% platform uptime across Microsoft's global marketing platforms through proactive SLI monitoring, automated recovery mechanisms, and postmortem-driven continuous improvement.
- Built QA automation frameworks integrated with CI/CD pipelines -- embedding automated regression, performance testing, and service virtualisation into release gates.
- Modernised global marketing platforms via cloud migration and self-healing architectures, supporting 200% user growth with zero critical incidents over a 7-year tenure.

TechMahindra Pvt. Ltd.

Jul 2015 - Feb 2017

Technology Manager | Noida, India

- Led cross-functional global engineering teams delivering large-scale automation and DevOps transformation programmes, driving CI/CD adoption and improving release frequency across enterprise clients.

KEY PROJECTS

Robo Deployment Framework RBC Insurance

Kubernetes-native, technology-agnostic CI/CD orchestration platform providing self-service release pipelines with compliance-grade change governance. Reduced application onboarding from 5 weeks to 5 hours -- a 98% reduction -- across 250+ applications and 60+ teams.

Kubernetes · Python · Ansible · Splunk · GitHub · SOX/GDPR compliance pipelines

modeas High-Throughput Deployment Platform ADP

Enterprise CI/CD platform handling 200+ builds and deployments per hour, eliminating 10,000+ manual operational hours annually. Enabled frictionless high-frequency releases and improved deployment cadence by 600% across ADP's global engineering organization.

Jenkins · GitHub Actions · Terraform · Ansible · Azure · AWS · Python

ADP SRE Reliability Programme ADP

End-to-end SRE transformation: defined SLIs, SLOs, and error budgets across multi-client banking platforms; deployed full-stack observability (Prometheus, Grafana, Dynatrace); established blameless postmortem culture and Ansible-driven automated remediation. Reduced MTTR by 40%+ and scaled the SRE organisation from 4 to 35 engineers.

Prometheus · Grafana · Dynatrace · Ansible · Python · Keptn (chaos engineering) · Azure · AWS

CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	2026
AWS Certified Solutions Architect -- Associate (SAA-C01)	2026
Certified Kubernetes Application Developer (CKAD)	2025
AZ-305: Designing Microsoft Azure Infrastructure Solutions	2025
AI-102: Designing and Implementing a Microsoft Azure AI Solution	2025
Certified SRE (iSRE)	
ITIL® Certificate in IT Service Operations	
PMI Agile Certified Professional (PMI-ACP)	

EDUCATION

Masters in Artificial Intelligence Woolf University	2024
General Management Program (GMP) ISB Hyderabad	2022
M.Sc in Computer Science Osmania University	2002

TECHNICAL SKILLS

Cloud & IaC: Azure (AKS, App Insights, DevOps), AWS (EKS, CDK, SAA), Terraform, CloudFormation, Helm, Ansible

Containers & Orchestration: Kubernetes, Docker, ECS, Helm -- zero-downtime deployments, blue-green/canary strategies

CI/CD & GitOps: Jenkins, GitHub Actions, GitLab CI, Azure DevOps, GitOps-style IaC workflows, UrbanCode

Observability: Prometheus, Grafana, Dynatrace (Datadog-equivalent), Splunk, MS Application Insights, AppDynamics, Telegraf

SRE & Reliability: SLIs/SLOs, Error Budgets, Chaos Engineering (Keptn), Self-Healing Frameworks, ITIL, ServiceNow

Scripting: Python, Bash, PowerShell, Go, Groovy

Compliance: SOX, GDPR, SOC 2 / PCI DSS equivalency pipelines, audit-ready change governance
