

Pavan Kumar Nayakanti

Cloud Operations Engineer | DevOps & SRE | Azure & AWS | Kubernetes | IaC | Microservices | CI/CD | Python & PowerShell

+91-9440493097 pavan.nayakanti@hotmail.com linkedin.com/in/pavan-nayakanti Hyderabad, India

EXPERIENCE

Sr. Specialist - Cloud Practice & SRE

IRIS Software - India (Clients: ADP, Charles Schwab, BMO)

Sep 2020 - Present Hyderabad, India

- High-Throughput CI/CD Platform (modeas):** Designed and delivered a cloud-native deployment platform handling 200+ builds/deployments per hour using Kubernetes, Docker, and Helm; eliminated 10,000+ manual operational hours annually and improved deployment cadence by 600%.
- IaC & Cloud-Native Infrastructure (BMO):** Authored Terraform and AWS CDK pipelines for .NET application workloads on ECS Fargate and Lambda; implemented HA/DR architecture and automated certificate, storage, and health management from day one.
- Observability & SRE Automation (ADP):** Deployed Prometheus, Grafana, Dynatrace, and Splunk for full-stack observability across multi-cloud platforms; built Ansible and Python automated remediation workflows reducing MTTR by 40%+.
- GenAI Cloud Services (BMO):** Designed and operated serverless GenAI assistants on Azure and AWS (Azure Functions, API Management, retrieval pipelines) for risk summarisation and Q&A; implemented OAuth2 and token management for secure multi-tenant access.
- Cloud Environment Management:** Proactively managed cloud environments including certificates, storage accounts, Key Vault configurations, backup status, and health monitoring across ADP, Schwab, and BMO; enforced operational readiness standards before service acceptance.
- Chaos Engineering & Self-Healing:** Implemented Keptn-based chaos engineering for proactive fault injection; built self-healing remediation frameworks that converted reactive incident response to predictive reliability.
- Incident Response:** On-call incident management for ADP SRE; blameless postmortem culture, structured RCA workflows, and measurable MTTR reduction across distributed cloud platforms.

Automation Technology Specialist

IRIS Software - Toronto, Canada (Client: Royal Bank of Canada)

Jun 2018 - Sep 2020 Toronto, Canada

- Self-Service CI/CD Platform (Robo Deployment Framework):** Built a PowerShell-native CI/CD orchestration platform enabling self-service release pipelines for .NET/C# services, Windows services, and database deployments (SSIS, Oracle, SQL Server); reduced application onboarding from 5 weeks to 5 hours (98% reduction).
- Security & Identity Compliance:** Integrated SAST, DAST, and IAST scanning (SonarQube, JFrog Artifactory) across CI/CD pipelines; enforced OAuth2 token management, OpenID Connect authentication flows, and SOX/GDPR compliance across 250+ application workloads.
- Observability Pipeline:** Implemented Splunk-based log aggregation and alerting integrated with CI/CD; established DORA metrics (Deployment Frequency, MTTR, Change Failure Rate) via Azure DevOps for measurable engineering health.
- GitHub Enterprise Migration:** Automated migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub, enabling modern CI/CD, self-service provisioning, and agile collaboration at scale.
- Established SRE principles - observability standards, incident classification frameworks, and reliability-focused deployment gates - across 250+ RBC applications.

SUMMARY

20+ year cloud operations and DevOps/SRE engineer with deep hands-on expertise in Azure and AWS cloud platforms, Kubernetes container orchestration, IaC (Terraform, AWS CDK), and CI/CD automation. Designed and operated high-throughput deployment platforms (200+ builds/hour), built Splunk and Prometheus observability pipelines, enforced OAuth2/OpenID Connect security patterns, and delivered serverless and microservices solutions for Tier-1 financial services clients. Certified across Azure (AZ-305, AI-102), AWS (SAA-C01), GCP, and CKAD. Strong C#/.NET Core background from Microsoft and RBC production engineering.

KEY ACHIEVEMENTS

- 98% Onboarding Reduction**
Robo Deployment Framework (PowerShell CI/CD) cut application onboarding from 5 weeks to 5 hours across 250+ apps at RBC.
- modeas: 200+ Builds/Hour**
Cloud-native deployment platform eliminated 10,000+ manual ops hours annually; 600% improvement in deployment cadence.
- MTTR -40% via AIOps**
Ansible + Python automated remediation with Dynatrace/Prometheus observability at ADP SRE; reduced mean time to recover by 40%+.
- 250+ Apps to GitHub**
Automated migration of 250+ applications across 60+ teams from legacy CA SCM to GitHub Enterprise; enabled self-service CI/CD at scale.

Automation Architect

IRIS Software - Toronto, Canada (Insurance & Capital Markets)

Feb 2017 - Jun 2018 Toronto, Canada

- Designed fault-tolerant container-orchestrated deployment pipelines using Kubernetes and Helm for zero-downtime rollouts across capital markets platforms.
- Led RPA/automation delivery across 80+ applications and 250+ components on heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe); standardised Python-based automation frameworks.
- Pioneered Cognitive and Intelligent Process Automation (CPA/IPA) leveraging REST APIs, microservices integration, and serverless patterns for enterprise automation.

Technology Manager - Cloud & Platform

TechMahindra Pvt. Ltd. - India (Client: Adobe)

Jul 2015 - Feb 2017 Noida, India

- Architected zero-downtime business application migration during Adobe's data centre relocation; led SAP HANA upgrades and end-to-end ETL migration (Informatica to SQL Server 2012).
- Delivered HTTP/7 enablements and platform modernisation on C#.NET stack with minimal service disruption across production workloads.

Sr. SDET - Production Engineering

Microsoft Corporation - India

Jul 2007 - Dec 2014 Hyderabad, India

- Owned end-to-end production operations for Sales & Marketing platforms (US, EMEA, APAC): incident response, infrastructure administration (Windows/Linux), RCA, and 99.99% uptime over 7 years.
- Built QA automation frameworks in C# integrated into CI/CD pipelines; implemented performance testing and service virtualisation as release gates; managed cloud migration and self-healing architectures supporting 200% user growth.

CERTIFICATIONS

Azure Solutions Architect Expert (AZ-305)

Microsoft - 2026

AWS Certified Solutions Architect - Associate

Amazon Web Services - 2026

Certified Kubernetes Application Developer (CKAD)

CNCF - 2025

AI-102: Azure AI Solution Design

Microsoft - 2025

Professional Cloud Architect (GCP)

Google Cloud - 2026

Certified SRE (iSRE)

iSRE Institute

EDUCATION

Masters in Artificial Intelligence 2024

Woolf University

General Management Program 2022

ISB Hyderabad

M.Sc in Computer Science 2002

Osmania University
