EXPERIENCE

Sr. Specialist - Cloud Practice & SRE

IRIS Software - India (Clients: ADP, Charles Schwab, BMO)

Sep 2020 - Present Hyderabad, India

- IaC & Landing Zone Frameworks:** Designed and maintained Terraform and AWS CDK infrastructure-as-code modules for cloud landing zones across ADP, Schwab, and BMO; established reusable templates for VPCs, IAM policies, compute, storage, and network security across AWS and Azure environments.
- Cloud Platform Engineering (BMO):** Architected AWS infrastructure for .NET application workloads on ECS Fargate and Lambda serverless functions; automated certificate management, Key Vault configuration, storage accounts, backup policies, and health monitoring using CDK pipelines - HA/DR built into every deployment.
- Observability & Platform Optimisation (ADP):** Deployed and operated full-stack observability platforms using Prometheus, Grafana, Dynatrace, and Splunk; built Python and Ansible automated remediation workflows reducing MTTR by 40%+; proactive cloud environment health management across multi-cloud platforms.
- High-Throughput CI/CD Platform (modeas):** Designed and delivered cloud-native deployment automation handling 200+ builds/deployments per hour using Kubernetes, Docker, and Helm; eliminated 10,000+ manual operational hours annually and improved deployment cadence by 600%.
- Chaos Engineering & Self-Healing Infrastructure:** Implemented Keptn-based chaos engineering for proactive fault injection and resilience testing; built self-healing remediation frameworks converting reactive incident response to predictive platform stability.
- SRE & Continuous Improvement:** Defined and governed SLI/SLO frameworks and error budgets; ITIL-aligned incident, problem, and change management with blameless postmortem culture and measurable improvement in platform reliability and change success rate.
- GenAI Cloud Services (BMO):** Deployed serverless AI assistants on Azure and AWS (Azure Functions, retrieval pipelines) for risk summarisation; implemented OAuth2/token management and security guardrails for multi-tenant platform access.

Automation Technology Specialist

IRIS Software - Toronto, Canada (Client: Royal Bank of Canada)

Jun 2018 - Sep 2020 Toronto, Canada

- Self-Service CI/CD & Automation Platform:** Designed and delivered Robo Deployment Framework - PowerShell and Python-native CI/CD orchestration platform for self-service release pipelines across .NET/C# services, Windows services, and database workloads (SSIS, Oracle, SQL Server); reduced application onboarding from 5 weeks to 5 hours (98% reduction).
- Security & Compliance in Pipelines:** Enabled SAST, DAST, and IAST scanning (SonarQube, JFrog Artifactory) across CI/CD; enforced OAuth2/OIDC, SOX/GDPR compliance, and audit-ready change transparency across 250+ applications; Splunk-based observability integrated with deployment gates.
- DORA Metrics & Platform Health:** Implemented DORA framework (Deployment Frequency, MTTR, Change Failure Rate, Lead Time) via Azure DevOps across RBC Wealth Management and Insurance; drove measurable improvement in delivery performance and production stability.
- Automated migration of 250+ applications across 60+ teams from CA SCM/Harvest to GitHub Enterprise; enabled modern self-service CI/CD and agile collaboration at scale.

SUMMARY

20+ year infrastructure and platform engineering specialist with deep hands-on expertise across AWS and Azure cloud platforms, Terraform and AWS CDK infrastructure-as-code, Kubernetes container orchestration, and full-stack observability (Prometheus, Grafana, Dynatrace, Splunk). Designed reusable landing zone frameworks and IaC templates for global enterprises in regulated financial services, operated high-throughput CI/CD platforms (200+ builds/hour), and built self-healing, SRE-governed infrastructure at scale. Certified across Azure (AZ-305), AWS (SAA-C01), GCP, and CKAD. Strong background in cross-functional collaboration with Network, Security, and Data & AI teams to deliver scalable, secure, and cost-effective platform solutions.

KEY ACHIEVEMENTS

- modeas: 200+ Builds/Hour**
Cloud-native CI/CD platform eliminated 10,000+ manual ops hours/year; 600% deployment cadence improvement across multi-cloud environments.
- 98% Onboarding Reduction**
Robo Deployment Framework (PowerShell/Python IaC) cut app onboarding from 5 weeks to 5 hours at RBC across 250+ applications.
- MTTR -40% via Automation**
Prometheus + Dynatrace observability with Ansible auto-remediation at ADP; measurable MTTR reduction across multi-cloud SRE platforms.
- CPMI Landing Zone Framework**
Cloud Platform Maturity Index: reusable architecture templates and governance guardrails deployed across ADP, Charles Schwab, and BMO.

Automation Architect

IRIS Software - Toronto, Canada (Insurance & Capital Markets)

Feb 2017 - Jun 2018 Toronto, Canada

- Designed fault-tolerant container-orchestrated deployment pipelines using Kubernetes and Helm - zero-downtime rollouts for capital markets platforms; standardised Python and Bash automation frameworks for enterprise workloads.
- Delivered automation across 80+ applications and 250+ components on heterogeneous stacks (Java, NodeJS, Kafka, Salesforce, Mainframe); pioneered Cognitive Process Automation (CPA/IPA) via REST APIs and microservices integration.

Technology Manager - Infrastructure & Platform

TechMahindra Pvt. Ltd. - India (Client: Adobe)

Jul 2015 - Feb 2017 Noida, India

- Architected zero-downtime business application migration during Adobe's data centre relocation - owned full plan, execution, and cutover across all production workloads; led SAP HANA upgrades and Informatica-to-SQL Server ETL migration at enterprise scale.

Sr. SDET - Production Engineering

Microsoft Corporation - India

Jul 2007 - Dec 2014 Hyderabad, India

- End-to-end ownership of production operations for global Sales & Marketing platforms (US, EMEA, APAC): incident response, infrastructure administration (Windows/Linux), RCA, and 99.99% sustained uptime over 7 years.
- Built CI/CD-integrated QA automation frameworks; implemented cloud migration and self-healing architectures supporting 200% user growth with no degradation in platform reliability.

CERTIFICATIONS

Azure Solutions Architect Expert (AZ-305)

Microsoft - 2026

AWS Certified Solutions Architect - Associate

Amazon Web Services - 2026

Certified Kubernetes Application Developer (CKAD)

CNCF - 2025

Professional Cloud Architect (GCP)

Google Cloud - 2026

Certified SRE (iSRE)

iSRE Institute

ITIL Certificate in IT Service Operations

AXELOS

EDUCATION

Masters in Artificial Intelligence 2024

Woolf University

General Management Program 2022

ISB Hyderabad

M.Sc in Computer Science 2002

Osmania University
