

PAVAN KUMAR NAYAKANTI

+91-9440493097 | pavan.nayakanti@hotmail.com | linkedin.com/in/pavan-nayakanti | github.com/pavannayakanti | Hyderabad, India

PROFESSIONAL SUMMARY

SRE and Platform Engineering leader with 20+ years building reliability organizations for ADP, Charles Schwab, BMO, and RBC -- scaling from 4-engineer teams to 40-engineer platform organizations across global FinTech and banking. Specialist in SLI/SLO/error budget frameworks, blameless postmortem culture, AIOps-driven automated remediation (MTTR -40%+), and Chaos Engineering (Keptn) for proactive fault-tolerance in distributed financial systems. Deployed production Retrieval-Augmented Generation (RAG) pipelines on AWS Bedrock for regulated financial workflows -- applying Prompt Engineering to generate accurate, context-grounded outputs for risk analysis and incident response automation. Deep expertise in full-stack observability (Prometheus, Grafana, Dynatrace, Splunk), multi-cloud infrastructure (AWS, GCP, Azure), Terraform IaC, Kubernetes, and CI/CD at enterprise scale.

CORE COMPETENCIES

Site Reliability Engineering (SLI / SLO / Error Budgets)

Incident Management & Blameless Postmortem Culture

Observability Platform Engineering

Chaos Engineering & Production Hardening

GenAI-Augmented SRE (RAG / Prompt Engineering)

AIOps & Automated Remediation

Platform Engineering & Deployment Automation

SRE Team Scaling & Technical Leadership

WORK EXPERIENCE

IRIS Software Sep 2020 -- Present

Sr. Specialist -- Cloud Practice & SRE Lead | India · Clients: ADP, Charles Schwab, BMO

- SLI/SLO & Error Budget Governance:** Defined and governed SLOs, SLIs, and error budgets across multi-client cloud platforms (ADP, Charles Schwab, BMO) -- establishing reliability thresholds aligned to business commitments and driving engineering teams to treat reliability as a first-class feature.
- Incident Management & Blameless Postmortems:** Led incident response and postmortem programmes for ADP SRE -- instituted blameless postmortem culture and Ansible-based automated remediation triggered by Dynatrace alerting, reducing MTTR by 40%+; measurably improved change success rates across a 35-engineer global org.
- Chaos Engineering:** Implemented Keptn-based Chaos Engineering framework at ADP -- designed structured fault injection scenarios and game days across distributed financial platforms, proactively surfacing hidden failure modes and hardening production systems before business impact.
- GenAI-Augmented SRE (RAG / Prompt Engineering):** Deployed production Retrieval-Augmented Generation (RAG) pipeline on AWS Bedrock for BMO -- engineered RAG architecture for risk summarisation and dynamic Q&A, applying Prompt Engineering to generate accurate, context-grounded outputs for regulated financial workflows; established runbooks and escalation protocols for LLM production operations.
- Observability Platform:** Deployed Prometheus and Grafana alongside Dynatrace for full-stack observability across ADP's platform -- real-time alerting, root cause analysis, and proactive bottleneck identification; integrated with ServiceNow for automated incident creation and closed-loop remediation.
- SRE Team Scaling:** Scaled ADP's SRE organization from 4 to 40 engineers across India, Canada, and the US; built Charles Schwab's 18-member Platform Engineering team from ground zero within one quarter -- defining SRE practices, reliability reviews, incident governance, and on-call frameworks from scratch.
- Platform Automation & Toil Elimination:** Delivered modern high-throughput deployment platform (200+ builds/deployments per hour) via Terraform IaC, self-healing pipelines, and canary releases -- eliminated 10,000+ manual ops hours annually; presented reliability strategies, error budget reviews, and resiliency outcomes directly to VP and C-suite stakeholders at ADP, Schwab, and BMO.

IRIS Software -- Royal Bank of Canada Jun 2018 -- Sep 2020

Automation Technology Specialist | Toronto, Canada · Client: RBC Insurance & Wealth Management

- DORA Framework & Engineering Health KPIs:** Implemented DORA framework across RBC Wealth Management and Insurance via Azure DevOps - established Deployment Frequency, Lead Time for Changes, Change Failure Rate, and MTTR as primary engineering health metrics, driving measurable improvement in delivery performance and production stability.
- Observability at Scale:** Implemented Splunk-based log aggregation and alerting pipelines integrated with CI/CD workflows -- enabling proactive detection and rapid response to production incidents across 250+ applications.
- DevSecOps & Deployment Automation:** Governed enterprise DevOps and change management across 250+ applications, 60+ teams -- enforced SOX/GDPR compliance, enabled SAST/DAST/IAST scanning; designed Robo Deployment Framework reducing app onboarding from 5 weeks to 5 hours (98% reduction) across 250+ apps.

IRIS Software

Feb 2017 -- Jun 2018

Automation Architect | Toronto, Canada · Clients: Insurance & Capital Markets

- Designed fault-tolerant, container-orchestrated deployment pipelines using Kubernetes and Helm for capital markets platforms; led RPA practice automating 80+ applications across Java, NodeJS, Kafka, Salesforce, and Mainframe stacks; pioneered Cognitive Process Automation (CPA/IPA) programmes.

TechMahindra Pvt. Ltd.

Jul 2015 -- Feb 2017

Technology Manager | Noida, India · Client: Adobe

- Led zero-downtime business application migration during Adobe's data centre relocation; SAP HANA upgrades and ETL re-engineering (Informatica to SQL Server) at enterprise scale.

Microsoft Corporation

Jul 2007 -- Dec 2014

Sr. SDET -- QA, Automation & Production Engineering | India

- Dual mandate as Production Engineering owner and Sr. SDET for Sales & Marketing platforms (US, EMEA, APAC): owned end-to-end incident response, RCA, and reliability governance -- defining NFR standards (performance, availability, scalability, security) across network, infrastructure, and application tiers; sustained 99.99% uptime over 7 years for tens of thousands of users.

KEY INITIATIVES

ADP SRE Scale-Up -- 4 to 40 Engineers & SRE Platform Build

SRE Org Build

Scaled ADP's SRE organization from 4 to 40 engineers across India, Canada, and the US -- establishing SLI/SLO governance, blameless postmortem culture, Chaos Engineering (Keptn), and full-stack observability (Prometheus + Grafana + Dynatrace + Ansible). MTTR reduced 40%+.

Prometheus · Grafana · Dynatrace · Ansible · Keptn · ServiceNow · Python · ITIL

BMO GenAI -- Production RAG Pipeline & Prompt Engineering for SRE

GenAI / RAG

Engineered production RAG architecture on AWS Bedrock for BMO -- Retrieval-Augmented Generation for risk summarisation and dynamic Q&A, applying Prompt Engineering to generate accurate, context-grounded outputs for regulated financial workflows (BCRG and LTS pipelines); established production runbooks, LLM monitoring, and incident escalation protocols.

AWS Bedrock · RAG · Prompt Engineering · LLM Monitoring · Python · ServiceNow

modeas -- High-Throughput Deployment Platform & Self-Healing Pipelines

Platform Automation

Architected modeas deployment platform handling 200+ builds/deployments per hour via Terraform IaC, canary releases, and self-healing pipelines -- eliminated 10,000+ manual ops hours annually, improved deployment cadence 600%.

Terraform · AWS CDK · Jenkins · GitHub Actions · Python · Kubernetes

EDUCATION

Masters in Artificial Intelligence	Woolf University	2024
General Management Program (GMP)	ISB Hyderabad	2022
M.Sc in Computer Science	Osmania University	2002

CERTIFICATIONS

Certified SRE (iSRE)	iSRE	
Google Cloud Certified -- Professional Cloud Architect (PCA)	Google Cloud	2026
AWS Certified Solutions Architect -- Associate (SAA-C01)	Amazon Web Services	2026
Certified Kubernetes Application Developer (CKAD)	CNCF	2025
Microsoft Certified: Azure AI Engineer Associate (AI-102)	Microsoft	
Microsoft Certified: Azure Solutions Architect Expert (AZ-305)	Microsoft	2026
ITIL® Certificate in IT Service Operations	ITIL / Axelos	
PMI Agile Certified Professional (PMI-ACP)	PMI	

SKILLS

Reliability:	SLI/SLO, Error Budgets, Chaos Engineering (Keptn), Self-Healing, Blameless Postmortem, ITIL
Observability:	Prometheus, Grafana, Dynatrace, Splunk, MS AppInsights, Telegraf; log aggregation at scale (evaluating ELK/OpenSearch)
Cloud & IaC:	AWS, GCP, Microsoft Azure, Terraform, AWS CDK, Ansible, Kubernetes, Docker, Helm
CI/CD:	Jenkins, GitHub Actions, GitLab, Azure DevOps, UrbanCode
GenAI & AIOps:	RAG Pipelines, Prompt Engineering, AWS Bedrock, Azure OpenAI, MLOps, AIOps
Languages:	Python, Go, Bash, PowerShell, Groovy
